V4X1DQ - FITZGERALD HOWELL

Dawn Conners's parents are famous for finding historic treasures, but she has a knack for losing things—her job, her boyfriend, and now, her reputation. Thanks to a mud-slinging exposé, Dawn's late great-grandfather is assumed guilty of stealing silver from a century-old shipwreck. Hoping to clear his name, Dawn returns to Starlight Cove, her idyllic hometown on Lake Michigan, where the doomed vessel sleeps beneath the beam of a ramshackle lighthouse. Her plan: remodel and sell the lighthouse while untangling the perplexing family mystery. Neither task is easy, especially once her well-meaning parents and the quirky locals—including nautical researcher and Starlight Cove's most eligible bachelor, Kip Whittaker—get involved. Despite their attraction, Dawn is reluctant to trust Kip, or any of the close-knit townsfolk. But as she pieces together the truth, Dawn's once-shuttered heart opens up. And if she's willing, the lighthouse might guide her to a place she never expected to find,

where the past entwines with a bright new beginning.

A murder with three witnesses. But one of them doesn't believe what she saw... Halloween, Whitby. DCI Jim Oldroyd's daughter Louise is in town with friends for a goth festival. But their visit to an escape room ends in bloody murder when one of the group stabs his girlfriend and flees the scene. It's a crime with three witnesses--but Louise refuses to take what she saw at face value. Oldroyd and DS Carter are called in to solve the case, assisted from the sidelines by Louise. But the closer they investigate, the more complex the web of deceit appears. This is no straightforward crime of passion. Large Print Edition A gripping and emotional novel that will leave you wondering about the neighbors next door... On a cold January night, Sharon Lemke heads outside to see a lunar eclipse when she notices something odd at the house behind her backyard. Through her neighbor's kitchen window, she sees what appears to be a little girl washing dishes late at night. But the Fleming family doesn't have a child that age, and even if they did, why would she be doing housework at this late hour? It would be easy for Sharon to just let this go, but when eighteen-year-old Niki, a former foster child, comes to live with Sharon, she notices suspicious activity at the Flemings' house as well. When calling social services doesn't result in swift action, the two decide to investigate on their own.

When Animal returns to Harlem, he is captured by Shai Clark and sentenced to death by the crime boss, only to discover that the executioner is actually his missing father, and the two band together to defeat a common enemy.

When the Texas State Capitol burned to the ground in 1881, Texas was land rich but cash poor. The state advertised 3,000,000 acres of land in the Panhandle

of Texas for the price of a new state house. John Farwell, a merchant from Chicago, seized the opportunity and made the deal; three million dollars for three million acres of West Texas, where only stray cattle and Indians occupied the land. Farwell's Folly is the story of the development of that land into the XIT Ranch, the largest cattle ranch in the world, stretching across ten counties and requiring 6,000 miles of fencing. It has been more than 30 years since a book has come out on the famous XIT ranch of Texas. Now Texas writer Dede Casad brings this mystique of this historic ranch out of the tumble weeds of West Texas into the modern age for readers who love to read about the often forgotten tales of early Texas. Several earlier books chronicled the rise and fall of the XIT Ranch, but Casad has also roped in colorful stories of the first cowboys, cattle rustling and cattlemen as entrepreneurs, and tied them into the historical fiber of Texas. The idea of a man who lived in Chicago purchasing three million acres of undeveloped territory in Texas, sight unseen, takes one's breath away, even in this day and time. Was it wise or as Casad suggests—folly? That's the story you don't want to miss.

Most people know that there are 70 million Baby Boomers in America today....but what is less known is that there are approximately 100 million people in America between the ages of 16 and 30. This generation has just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education on the basics of money management. Many have large debts from student loans looming over their heads. And many feel con-

fused and powerless when their pricey educations don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing, and they constantly fear that there will be "too much month left at the end of their money." Douglas R. Andrew has shown the parents of this generation a different pathway to financial freedom. Now Doug and his sons, Emron and Aaron - both of whom are in their mid-20s - show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes and using life insurance to create tax-free income. With the principles outlined in *Millionaire by Thirty*, recent graduates will be earning enough interest on their savings to meet their basic living expenses by the time they're 30. And by the time they're 35, their investments will be earning more money than they are, guaranteeing them a happy, wealthy future.

A New York Review Books Original *Hav* is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of *Hav*, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published *Last Letters from Hav* in 1985, it was short-listed for the Booker Prize. Here it is joined by *Hav of the Myrmidons*, a sequel that brings the story up-to-date. Twenty-first-century *Hav* is nearly unrec-

ognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.

Among the famous ranch brands of Texas are the T Anchor, JA, Diamond Tail, 777, Bar C, and XIT. And the greatest of these was XIT—The XIT Ranch of Texas. It was not the first ranch in West Texas, but after its formation in the eighteen-eighties it became the largest single operation in the cow country of the Old West and covered more than three million acres, all fenced. The state of Texas patented this huge rectangle of land, at the time considered by many to be part of "the great American desert," to the Capitol Freehold Land and Investment Company of Chicago, in exchange for funds to erect the state capitol building in Austin. This "desert" became a legend in the cattle business, and it remains today a memory to thousands who recall the era when mustangs and longhorns grazed beneath the brand of the XIT. The development and operation of this pastoral enterprise and its relation to the history of Texas is the subject of this great and widely discussed book by J. Evetts Haley, now made available to readers everywhere. It is the story of a wild prairie, roamed by Indians, buffalo, mustangs, and antelope, that became a country of railroads, oil fields, prosperous farms, and carefully bred herds of cattle. The XIT Ranch of Texas is the epic account of a ranching operation about which many know a little but only a few very much. It is the one volume that, more than any other, portrays the early--

day cattle business of the West.

Foreword by Dr. Asad Madni, C. Eng., Fellow IEEE, Fellow IEE Learn the fundamentals of RF and microwave electronics visually, using many thoroughly tested, practical examples RF and microwave technology are essential throughout industry and to a world of new applications-in wireless communications, in Direct Broadcast TV, in Global Positioning System (GPS), in healthcare, medical and many other sciences. Whether you're

seeking to strengthen your skills or enter the field for the first time, Radio Frequency and Microwave Electronics Illustrated is the fastest way to master every key measurement, electronic, and design principle you need to be effective. Dr. Matthew Radmanesh uses easy mathematics and a highly graphical approach with scores of examples to bring about a total comprehension of the subject. Along the way, he clearly introduces everything from wave propagation to impedance matching in transmission line circuits, microwave linear amplifiers to hard-core nonlinear active circuit design in Microwave Integrated Circuits (MICs). Coverage includes: A scientific framework for learning RF and microwaves easily and effectively Fundamental RF and microwave concepts and their applications The characterization of two-port networks at RF and microwaves using S-parameters Use of the Smith Chart to simplify analysis of complex design problems Key design considerations for microwave amplifiers: stability, gain, and noise Workable considerations in the design of practical active circuits: amplifiers, oscillators, frequency converters, control circuits RF and Microwave Integrated Circuits (MICs) Novel use of "live math" in circuit analysis and design Dr. Radmanesh has drawn upon his many years of practical experience in the microwave industry and educational arena to introduce an exceptionally wide range of practical concepts and design methodology and techniques in the most comprehensible fashion. Applications include small-signal, narrow-band, low noise, broadband and multistage transistor amplifiers; large signal/high power amplifiers; microwave transistor oscillators, negative-resistance circuits, microwave mixers, rectifiers and detectors, switches, phase shifters and attenuators. The

book is intended to provide a workable knowledge and intuitive understanding of RF and microwave electronic circuit design. Radio Frequency and Microwave Electronics Illustrated includes a comprehensive glossary, plus appendices covering key symbols, physical constants, mathematical identities/formulas, classical laws of electricity and magnetism, Computer-Aided-Design (CAD) examples and more. About the Web Site The accompanying web site has an "E-Book" containing actual design examples and methodology from the text, in Microsoft Excel environment, where files can easily be manipulated with fresh data for a new design.

The northernmost portion of the Texas Panhandle, the Dalhart High Plains area, is perhaps best known for its legendary cold weather. There is "only a barbed wire fence between it and the North Pole," as the saying goes. To many it is famed for the three-million-acre XIT Ranch that was carved out of the Texas Public Domain as payment for construction of the State Capitol building in Austin, pursuant to a contract let in 1832. Buffalo Springs, thirty miles northwest of Dalhart, was the original XIT headquarters, and many early residents of the Dalhart area spent their youthful years as cowboys on the ranch. From about 1901 to about 1939, those living in the High Plains area witnessed and took part in its transition from a purely cattle-raising empire to a cattle and farming empire. Only venturesome, independent, and self-reliant people were willing to cast their fate with the High Plains. In "High Plains Yesterdays," John C. Dawson, a retired Houston lawyer who grew up in Dalhart, captures the personalities and characters of some of these people and makes the reader intimately acquainted with them. The uninitiated will also feel the blizzards, sandstorms, droughts, and hot winds, and the contrasting clear, invigorating atmosphere, enormous skies, and broad vistas that the settlers experienced.
