Personalised Health Care Stefania Boccia 2020-11-23 Practitioners are increasingly adopting a personalised medicine approach to individually tailored patient care, especially disease diagnosis and treatment with the use of biomarkers. However, development and implementation of such approaches to chronic disease prevention need further investigation and concerted efforts for proper use in healthcare systems. This book provides high-quality, multidisciplinary knowledge from research in personalised medicine, specifically personalised prevention of chronic disease. It addresses different perspectives of prevention in the field, and is the outcome of a four-year work of the Personalized prevention of Chronic Disease (PRECeDI) Consortium, a multi-disciplinary and multi-professional team of experts. The Consortium jointly agreed to document and address the five aspects or domains of personalised medicine and prevention as individual chapters: Identification of biomarkers for the prevention of chronic disease Evaluation of predictive genomic applications Ethico-legal and policy issues surrounding personalised medicine Roles and responsibilities of stakeholders in informing healthy individuals on their genome: a sociotechnical analysis Identification of organisational models for the provision of predictive genomic applications The book focuses on the Consortium's recommendations that are derived from each of these domains based on up-to-date evidence and research that

the authors write, follow, and systematically organise and report. Personalisation of health care is, eventually, a driver of innovation in research and healthcare systems. With this SpringerBrief on Personalised Health Care: Fostering Precision Medicine Advancements for Gaining Population Health Impact, the Consortium provides further evidence of the clinical validity and utility of personalised medicine with special emphasis on the prevention of chronic diseases. The book is a useful resource for policy makers, industry and healthcare professionals, scientists, technology-sector professionals, investors, citizens, and private companies that need proper advice to realise the potential of personalised medicine.

Eat My Dust Georgine Clarsen 2008-08-26 The history of the automobile would be

incomplete without considering the influence of the car on the lives and careers of women in the earliest decades of the twentieth century. Illuminating the relationship between women and cars with case studies from across the globe, *Eat My Dust* challenges the received wisdom that men embraced automobile technology more naturally than did women. Georgine Clarsen highlights the personal stories of women from the United States, Britain, Australia, and colonial Africa from the early days of motoring until 1930. She notes the different ways in which these women embraced automobile technology in their national and cultural context. As mechanics and taxi drivers -- like Australian Alice Anderson and Brit Sheila O'Neil -- and long-distance adventurers and political activists -- like South Africans Margaret Belcher and Ellen Budgell and American suffragist Sara Bard Field -- women sought to define the technology in their own terms and according to their own needs. They challenged traditional notions of femininity through their love of cars and proved they were articulate, confident, and mechanically savvy motorists in their own right. More than new chapters in automobile history, these stories locate women motorists within twentieth-century debates about class, gender, sexuality, race, and nation. -- Deborah Clarke

BUDDHISM ITS CONNEXION WITH BRAHMANISM AND HINDUISM Sir Monier Monier-Williams 1889

The Oxford English Dictionary Sir James Augustus Henry Murray 1975

With the Persian Expedition Martin Henry Donohoe 2020-10-11 Exerpt from the book Well, chiefly because in the beginning of 1918 Fate and the War Office sent me into a field of operations almost unknown and unheeded of the average home keeping

Briton - via, that of north-west Persia, in the land lying towards the Caucasus and the Caspian Sea; and my experiences there led me into bypaths of the Great War so unusual as to seem well worth describing, quite apart from the military importance of the movements of which they were but a minute part. However, in the latter aspect, too, I hope my book will serve as a useful footnote to the history of the gigantic struggle now happily ended.

Message and Medium Caroline Tagg 2020-05-18 Studies of digital communication technologies often focus on the apparently unique set of multimodal resources afforded to users and the development of innovative linguistic strategies for performing mediated identities and maintaining online social networks. This edited volume interrogates the novelty of such practices by establishing a transhistorical approach to the study of digital communication. The transhistorical approach explores language practices as lived experiences grounded in historical contexts, and aims to identify those elements of human behaviour that transcend historical boundaries, looking beyond specific developments in communication technologies to understand the enduring motivations and social concerns that drive human communication. The volume reveals long-term patterns in the indexical functions of seemingly innovative written and multimodal resources and the ideologies that underpin them, and shows that methods are not necessarily contingent on their datasets: historical analytic frameworks can be applied to digital data and newer approaches used to understand historical data. These insights present exciting opportunities for English language researchers, both historical and modern.

Improvisation and Social Aesthetics
Georgina Born 2017-03-03 Addressing a wide range of improvised art and music forms—from jazz and cinema to dance and literature—this volume's contributors locate improvisation as a key site of mediation between the social and the aesthetic. As a

catalyst for social experiment and political practice, improvisation aids in the creation, contestation, and codification of social realities and identities. Among other topics, the contributors discuss the social aesthetics of the Association for the Advancement of Creative Musicians, the Feminist Improvising Group, and contemporary Malian music, as well as the virtual sociality of interactive computer music, the significance of "uncreative" improvisation, responses to French New Wave cinema, and the work of figures ranging from bell hooks and Billy Strayhorn to Kenneth Goldsmith. Across its diverse chapters, *Improvisation and Social Aesthetics* argues that ensemble improvisation is not inherently egalitarian or emancipatory, but offers a potential site for the cultivation of new forms of social relations. It sets out a new conceptualization of the aesthetic as immanently social and political, proposing a new paradigm of improvisation studies that will have reverberations throughout the humanities. Columbia Pictures Bernard F. Dick 2021-10-19 Drawing on previously untapped archival materials including letters, interviews, and more, Bernard F. Dick traces the history of Columbia Pictures, from its beginnings as the CBC Film Sales Company, through the regimes of Harry Cohn and his successors, and ending with a vivid portrait of today's corporate Hollywood. The book offers unique perspectives on the careers of Rita Hayworth and Judy Holliday, a discussion of Columbia's unique brands of screwball comedy and film noir, and analyses of such classics as *The Awful Truth*, *Born Yesterday*, and *From Here to Eternity*. Following the author's highly readable studio chronicle are fourteen original essays by leading film scholars that follow Columbia's emergence from Poverty Row status to world class, and the stars, films, genres, writers, producers, and directors responsible for its transformation. A new essay on Quentin Tarantino's *Once Upon a Time...in Hollywood* rounds out the collection and brings this seminal studio history into the 21st century. Amply illustrated with film stills and photos of stars and studio heads, *Columbia Pictures* is the first book to integrate history with criticism of a single studio, and is ideal for film lovers and scholars alike.

Private, the Public, and the Published Barbara Couture 2004-05 At the 2003 "Rock the Vote" debate, one of the questions posed by a student to the eight Democratic candidates for the presidential nomination was "have you ever used marijuana?" Amazingly, all but one of the candidates voluntarily answered the question. Add to this example the multiple ways in which we now see public intrusion into private lives (security cameras, electronic access to personal data, scanning and "wandering" at the airport) or private self-exposure in public forums (cell phones, web cams, confessional talk shows, voyeuristic "reality" TV). That matters so private could be treated as legitimate-in some cases even vital-for public discourse indicates how intertwined the realms of

private and public have become in our era. Reverse examples exist as well. Around the world, public authorities look the other way while individual rights are abused--calling it a private matter--or officials appeal to sectarian morés to justify discrimination in public policies. The authors of *The Private, the Public, and the Published* feel that scholarship needs to explore and understand this phenomenon, and needs to address it in the college classroom. There are consequences of conflating public and private, they argue--consequences that have implications especially for what is known as the public good. The changing distinctions between "private" and "public," and the various practices of private and public expression, are explored in these essays with an eye toward what they teach us about those consequences and implications.

Book of Rhymes Adam Bradley 2017-06-27

If asked to list the greatest innovators of modern American poetry, few of us would think to include Jay-Z or Eminem in their number. And yet hip hop is the source of some of the most exciting developments in verse today. The media uproar in response to its controversial lyrical content has obscured hip hop's revolution of poetic craft and experience: Only in rap music can the beat of a song render poetic meter audible, allowing an MC's wordplay to move a club-full of eager listeners. Examining rap history's most memorable lyricists and their inimitable techniques, literary scholar Adam Bradley argues that we must understand rap as poetry or miss the vanguard of poetry today. *Book of Rhymes* explores America's least understood poets, unpacking their surprisingly complex craft, and according rap poetry the respect it deserves.

Silence John Cage 1961-06 John Cage is the outstanding composer of avant-garde music today. The *Saturday Review* said of him: "Cage possesses one of the rarest qualities of the true creator- that of an original mind-

and whether that originality pleases, irritates, amuses or outrages is irrelevant." "He refuses to sermonize or pontificate. What John Cage offers is more refreshing, more spirited, much more fun--a kind of carefree skinny-dipping in the infinite. It's what's happening now." --The American Record Guide "There is no such thing as an empty space or an empty time. There is always something to see, something to hear. In fact, try as we may to make a silence, we cannot. Sounds occur whether intended or not; the psychological turning in direction of those not intended seems at first to be a giving up of everything that belongs to humanity. But one must see that humanity and nature, not separate, are in this world together, that nothing was lost when everything was given away."

The Wine Bible Karen MacNeil 2015-10-13 Announcing the completely revised and updated edition of *The Wine Bible*, the perennial bestselling wine book praised as "The most informative and entertaining book I've ever seen on the subject" (Danny Meyer), "A guide that has all the answers" (Bobby Flay), "Astounding" (Thomas Keller), and "A magnificent masterpiece of wine writing" (Kevin Zraly). Like a lively course from an expert teacher, *The Wine Bible* grounds the reader deeply in the fundamentals while layering on informative asides, tips, amusing anecdotes, definitions, glossaries, photos (all new for this edition), maps, labels, and recommended bottles. Karen MacNeil's information comes directly through primary research; for this second edition she has tasted more than 10,000 wines and visited dozens of wine regions around the world. New to the book are wines of China, Japan, Mexico, and Slovenia. And through it all the reader becomes ever more informed--and, because of the author's unique voice, always entertained: "In great years Pétrus is ravishing, elegant, and rich--Ingrid Bergman in red satin." Or, describing a Riesling: "A laser beam. A sheet of ice. A great crackling bolt of lightning."

Acute Heart Failure Alexandre Mebazaa 2009-12-24 For many years, there has been a great deal of work done on chronic congestive heart failure while acute heart failure has been considered a difficult to handle and hopeless syndrome. However, in recent years acute heart failure has become a growing area of study and this is the first book to cover extensively the diagnosis and

management of this complex condition. The book reflects the considerable amounts of new data reported and many new concepts which have been proposed in the last 3-4 years looking at the epidemiology, diagnostic and treatment of acute heart failure.

Trading Triads Felipe Tudela 2010-05-28 Trading Triads explains the 'Triads' method, a system that enables simple market analysis, flagging accurate turning points as well as precise entry and exit points for trades. The book begins by introducing the reader to the Triads method and how it was developed, as well as explaining how it reflects the fundamental structure of the market. The author goes on to explain the oscillatory nature of markets, their structure and their key elements. The book explains why most indicators give false signals and explains how to avoid them. After exploring fundamental market structure, the book explains the Triads strategy. It covers precise entry and exit points as well as stop placement. Also it explains how to use Triads at the same time as other indicators to trade the markets most successfully - for example, how a simple moving average traded with the help of Triads becomes a powerful trading tool that avoids most false signals. It also shows how to trade an MACD, stochastic or any other indicator/method with the help of Triads. The purpose of these examples is to show how the Triads methodology improves significantly any trading method or trading tool. The book aims to explain to the reader a new trading method which can simplify analysis of the market, and provide a simple and extremely versatile strategy which can sit alongside the trader's current range of tools to increase precision, and results, in their trading of the markets.

In a Queer Time and Place Judith Halberstam 2005-01-01 What is the price of a limb? A child? Ethnicity? Love? In a world that is often ruled by buyers and sellers, those things that are often considered priceless become objects to be marketed and from which to earn a profit. Ranging from black market babies to exploitative sex

trade operations to the marketing of race and culture, *Rethinking Commodification* presents an interdisciplinary collection of writings, including legal theory, case law, and original essays to reexamine the traditional legal question: "To commodify or not to commodify?" In this pathbreaking course reader, Martha M. Ertman and Joan C. Williams present the legal cases and theories that laid the groundwork for traditional critiques of commodification, which tend to view the process as dehumanizing because it reduces all human interactions to economic transactions. This "canonical" section is followed by a selection of original essays that present alternative views of commodification based on the concept that commodification can have diverse meanings in a variety of social contexts. When viewed in this way, the commodification debate moves beyond whether or not commodification is good or bad, and is assessed instead on the quality of the social relationships and wider context that is involved in the transaction. *Rethinking Commodification* contains an excellent array of contemporary issues, including intellectual property, reparations for slavery, organ transplants, and sex work; and an equally stellar array of contributors, including Richard Posner, Margaret Jane Radin, Regina Austin, and many others.

Assistive Technology Assessment Handbook
Stefano Federici 2017-11-23 Assistive
Technology Assessment Handbook, Second
Edition, proposes an international ideal
model for the assistive technology
assessment process, outlining how this
model can be applied in practice to re-
conceptualize the phases of an assistive
technology delivery system according to the
biopsychosocial model of disability. The
model provides reference guidelines for
evidence-based practice, guiding both
public and private centers that wish to
compare, evaluate, and improve their
ability to match a person with the correct
technology model. This second edition also
offers a contribution to the Global
Cooperation on Assistive Technology
(GATE) initiative, whose activities are
strongly focused on the assistive products
service delivery model. Organized into
three parts, the handbook: gives readers a
toolkit for performing assessments;
describes the roles of the assessment team
members, among them the new profession
of psychotechnologist; and reviews
technologies for rehabilitation and
independent living, including
brain-computer interfaces, exoskeletons,
and technologies for music therapy. Edited
by Stefano Federici and Marcia J. Scherer,
this cross-cultural handbook includes

contributions from leading experts across
five continents, offering a framework for
future practice and research.

Setting God Free Seán Ólaoire 2021-07-07
A priest, a scientist, and a psychologist
walk into a bar... This isn't the beginning of
a joke. It's the start of a long-overdue
conversation about how mainstream
religion has handed down a God that only a
sodomasochist could love. How are we
supposed to worship a deity who wantonly
slaughters innocents to assuage His own
bloodthirsty rage? Thank the loving God
revealed in the pages of *Setting God Free*
that Seán ÓLaoire has finally unpacked the
horror show known as "the difficult
passages" of the Bible, giving readers
access to a cosmology built not on
canonical scripture alone, but also on
science, spirituality, and personal
experience. And as for the God we humans
have created in our own image? His day in
court has finally come.
