Expanding the Frontiers of Visual Analytics and Visualization John Dill 2012-04-17
The field of computer graphics combines display hardware, software, and interactive techniques in order to display and interact with data generated by applications. Visualization is concerned with exploring data and information graphically in such a way as to gain information from the data and determine significance. Visual analytics is the science of analytical reasoning facilitated by interactive visual interfaces. *Expanding the Frontiers of Visual Analytics and Visualization* provides a review of the state of the art in computer graphics, visualization, and visual analytics by researchers and developers who are closely involved in pioneering the latest advances in the field. It is a unique presentation of multi-disciplinary aspects in visualization and visual analytics, architecture and displays, augmented reality, the use of color, user interfaces and cognitive aspects, and technology transfer. It provides readers with insights into the latest developments in areas such as new displays and new display processors, new collaboration technologies, the role of visual, multimedia, and multimodal user interfaces, visual analysis at extreme scale, and adaptive visualization.

Social Chemistry Marissa King 2022-01-04 "One of the most interesting and useful books ever written on networking."—Adam Grant *Social Chemistry* will utterly transform the way you think about "networking." Understanding the contours of your social network can dramatically enhance personal relationships, work life, and even your global impact. Are you an Expansionist, a Broker, or a Convener? The answer matters more than you think. . . . Yale professor Marissa King shows how anyone can build more meaningful and productive relationships based on insights from neuroscience, psychology, and network analytics. Conventional wisdom says it's the size of your network that matters, but social science research has proven there is more to it. King explains that the quality and structure of our relationships has the greatest impact on our personal and professional lives. As she illustrates, there are three basic types of networks, so readers can see the role they are already playing: Expansionist, Broker, or Convener. This network decoder enables readers to own their network style and modify it for better alignment with their life plans and values. High-quality connections in your social network strongly predict cognitive functioning, emotional resilience, and satisfaction at work. A well-structured network is likely to boost the quality of your ideas, as well as your pay. Beyond the office, social connections are the lifeblood of our health and happiness. The compiled results from dozens of previous studies found that our social relationships have an effect on our likelihood of dying prematurely—equivalent to obesity or smoking. Rich stories of Expansionists like Vernon Jordan, Brokers like Yo-Yo Ma, and Conveners like Anna Wintour, as well as personal experiences from King's own world of connections, inform this warm, engaging, revelatory investigation into some of the most consequential decisions we can make about the trajectory of our lives.

Critical Issues in South African Education Charl C. Wolhuter 2020-12-31 The main thesis of this book is that, given that South African education faces major challenges, the BRICS (Brazil, Russia, India, China and South Africa) constellation of states offers — thus far overlooked — a valuable tertium comparationis, a source of international comparative perspectives, to inform the domestic scholarly discourse on education. This book first investigates the national contexts and development of education in the BRICS countries, arguing that this grouping represents a valuable but yet overlooked field for illuminating South African education issues with international perspectives. The book consists of chapters arguing for and illustrating this thesis from a variety of angles. Common to all chapters is that authors used the comparative method in education, that is comparing the national education system, in their education societal context interrelationships, of the BRICS countries. The chapters focus on a number of critical issues in South African education, including the language of learning and teaching issue, the alignment of the world of education with the world of work, early childhood education, and the development of world-class universities. Regarding the last, for example, China has been the terrain of the most intensive

national projects of establishing world-class universities, with Project 985, Project 211, and the "Double First Class University" project. The chapters demonstrate what South Africa, in approaching her education issues, can learn from the experience of the BRICS countries.

To the Letter Simon Garfield 2014-11-04 The New York Times bestselling author of *Just My Type* and *On the Map* offers an ode to letter writing and its possible salvation in the digital age. Few things are as exciting—and potentially life-changing—as discovering an old letter. And while etiquette books still extol the practice, letter writing seems to be disappearing amid a flurry of e-mails, texting, and tweeting. The recent decline in letter writing marks a cultural shift so vast that in the future historians may divide time not between BC and AD but between the eras when people wrote letters and when they did not. So New York Times bestselling author Simon Garfield asks: Can anything be done to revive a practice that has dictated and tracked the progress of civilization for more than five hundred years? In *To the Letter*, Garfield traces the fascinating history of letter writing from the love letter and the business letter to the chain letter and the letter of recommendation. He provides a tender critique of early letter-writing manuals and analyzes celebrated correspondence from Erasmus to Princess Diana. He also considers the role that letters have played as a literary device from Shakespeare to the epistolary novel, all the rage in the eighteenth century and alive and well today with bestsellers like *The Guernsey Literary and Potato Peel Pie Society*. At a time when the decline of letter writing appears to be irreversible, Garfield is the perfect candidate to inspire bibliophiles to put pen to paper and create "a form of expression, emotion, and tactile delight we may clasp to our heart."

Freedom of Expression Kembrew McLeod 2007 In 1998 the author, a professional prankster, trademarked the phrase "freedom of expression" to show how the expression of ideas was being restricted. Now he uses intellectual property law as the focal point to show how economic concerns are seriously eroding creativity and free speech.

Healing Logics Erika Brady 1802-01-04 Scholars in folklore and anthropology are more directly involved in various aspects of medicine—such as medical education, clinical pastoral care, and negotiation of transcultural issues—than ever before. Old models of investigation that artificially isolated "folk medicine," "complementary and alternative medicine," and "biomedicine" as mutually exclusive have proven too limited in exploring the real-life complexities of health belief systems as they observably exist and are applied by contemporary Americans. Recent research strongly suggests that individuals construct their health belief systems from diverse sources of authority, including community and ethnic tradition, education, spiritual beliefs, personal experience, the influence of popular media, and perception of the goals and means of formal medicine. *Healing Logics* explores the diversity of these belief systems and how they interact—in competing, conflicting, and sometimes remarkably congruent ways. This book contains essays by leading scholars in the field and a comprehensive bibliography of folklore and medicine.

Improvisation and Social Aesthetics Georgina Born 2017-03-03 Addressing a wide range of improvised art and music forms—from jazz and cinema to dance and literature—this volume's contributors locate improvisation as a key site of mediation between the social and the aesthetic. As a catalyst for social experiment and political practice, improvisation aids in the creation, contestation, and codification of social realities and identities. Among other topics, the contributors discuss the social aesthetics of the Association for the Advancement of Creative Musicians, the Feminist Improvising Group, and contemporary Malian music, as well as the virtual sociality of interactive computer music, the significance of "uncreative" improvisation, responses to French New Wave cinema, and the work of figures ranging from bell hooks and Billy Strayhorn to Kenneth Goldsmith. Across its diverse chapters, *Improvisation and Social Aesthetics* argues that ensemble improvisation is not inherently egalitarian or emancipatory, but offers a potential site for the cultivation of new forms of

social relations. It sets out a new conceptualization of the aesthetic as immanently social and political, proposing a new paradigm of improvisation studies that will have reverberations throughout the humanities. Lewis, Ingrid Monson, Tracey Nicholls, Winfried Siemerling, Will Straw, Zoë Svendsen, Darren Wershler

With a Critical Eye Arthur J. Vidich 2009 Internationally renowned sociologist Arthur J. Vidich (1922-2006) was an active researcher and teacher whose career spanned the second half of the twentieth century. *With a Critical Eye: An Intellectual and His Times* recounts Vidich's career in the wider cultural context of his life and work. Providing a window into post-World War II intellectual life, the richness of the autobiography lies not only in Vidich's perspectives on the academic world but also in his personal and sociological observations about the world around him. Best known for his book *Small Town in Mass Society* (co-authored with Joseph Bensman, 1958), Vidich taught for more than forty years at the New School for Social Research in New York. He published eighteen books, co-edited a book series with Robert Jackall, and was the founding editor of the *International Journal of Politics, Culture, and Society*. Vidich "provides a valuable lens ... on a profoundly important time in the formation of the modern social sciences, when the changes in the U.S. were having formative impacts on academe in other parts of the world," writes Robert J. Antonio, professor of sociology at the University of Kansas. "The autobiography is lucidly and unpretentiously written." Book jacket.

Know Your Price Andre M. Perry 2020-05-19 The deliberate devaluation of Blacks and their communities has had very real, far-reaching, and negative economic and social effects. An enduring white supremacist myth claims brutal conditions in Black communities are mainly the result of Black people's collective choices and moral failings. "That's just how they are" or "there's really no excuse": we've all heard those not so subtle digs. But there is nothing wrong with Black people that ending racism can't solve. We haven't known how much the country will gain by properly valuing homes and businesses, family structures, voters, and school districts in Black neighborhoods. And we need to know. Noted educator, journalist, and scholar Andre Perry takes readers on a tour of six Black-majority cities whose assets and strengths are undervalued. Perry begins in his hometown of Wilkinsburg, a small city east of Pittsburgh that, unlike its much larger neighbor, is struggling and failing to attract new jobs and industry. Bringing his own personal story of growing up in Black-majority Wilkinsburg, Perry also spotlights five others where he has deep connections: Detroit, Birmingham, New Orleans, Atlanta, and Washington, D.C. He provides an intimate look at the assets that should be of greater value to residents—and that can be if they demand it. Perry provides a new means of determining the value of Black communities. Rejecting policies shaped by flawed perspectives of the past and present, it gives fresh insights on the historical effects of racism and provides a new value paradigm to limit them in the future. *Know Your Price* demonstrates the worth of Black people's intrinsic personal strengths, real property, and traditional institutions. These assets are a means of empowerment and, as Perry argues in this provocative and very personal

book, are what we need to know and understand to build Black prosperity.

The Principle of Equality in Diverse States Eva Maria Belser 2021-05-25 This book examines different approaches by which states characterised by federal or decentralized arrangements reconcile equality and autonomy. The Dead Sea Scrolls Weston Fields 2013-03-09 Who discovered the Dead Sea Scrolls? When and where were they discovered? How were they saved? Who has them now? Will more be discovered? Have all the scrolls been published? Are some still hidden away? Were there conspiracies to suppress some scrolls? How do the scrolls affect Christianity and Judaism? How similar are the biblical scrolls to our Bible today? These and other questions are answered in *The Dead Sea Scrolls, A Short History*, which offers information from exclusive interviews and unpublished archives.

The Chief Learning Officer Tamar Elkeles 2007 NEW - TAMAR ELKELES WINS PRESTIGIOUS AWARD! Tamar Elkeles, vice president of Qualcomm Learning Center and co-author of *The Chief Learning Officer*, has been named 2010 CLO of the Year by *Chief Learning Officer* magazine "Since she began with the company in 1992, Tamar Elkeles has built the Qualcomm Learning Center from a one-person operation into a sophisticated, integrated and innovative strategic resource for the organization" said Norm Kamikow, president and editor in chief of *Chief Learning Officer* magazine. Congratulations Tamar! ----- New business realities and customer demands, coupled with new technologies in a changing competitive landscape are causing corporate learning departments to rethink their value, role, and impact in the organization. In a constantly changing business landscape with limited resources and tight budgets, learning must be viewed as essential to a successful achievement of business goals. The individual driving this function, the Chief Learning Officer (CLO), is in a unique position to add significant value to the organization. The role of the CLO is to drive value, focusing on issues such as business alignment, managing resources, innovation, customer service and ROI. The challenge is to show value to the organization in terms that business leaders and financial analysts can understand and appreciate. Written from the perspective of the CLO, this book discusses nine important value-adding strategies, making up this critical role of the CLO of the future. At least twenty high profile CLOs provide their strategies on each of these issues. This book is essential reading for both the training and HR communities who need to show the value and connect learning to the business. This book shows the value that can be achieved in the organization if it is managed and organized properly and the appropriate leadership is provided. * Real world strategies from successful CLO's * Practical applications for skill development * Shows how to connect the learning enterprise to the business.

The Selling of 9/11 D. Heller 2016-09-23 *The Selling of 9/11* argues that the marketing and commodification of the terrorist attacks of September 11, 2001, reveal the contradictory processes by which consumers in the United States (and around the world) use, communicate, and construct national identity and their sense of national belonging through cultural and symbolic goods. Contributors illuminate these processes and make important connections between myths of nation, practices of mourning, theories of trauma, and the politics of post-9/11 consumer culture. Their essays take critical stock of the role that consumer goods, media and press outlets, commercial advertising, marketers and corporate public relations have played in shaping cultural memory of a national tragedy.

Eliminating Racism Phyllis A. Katz 2013-06-29 The chapters presented here provide the reader with an awareness of the divergent views of what constitutes racism and frameworks for reducing it. This book points out that the dialogue and research on this subject since the mid-1970s have yielded increased controversy over the theories, foundation, and continued existence of racism. Ironically, what we viewed in the 1954 Brown decision and the Civil Rights Act of 1964 as the beginning of the end of racism turned out to be the beginning of confusion over the course of action to ensure societal acceptance of political mandates. Hence, the title of this book captures the essence of the emotional core of any forum for examining racism, past and present. One of the most controversial forums has been that of education, beginning with the D.S. Supreme Court's 1954 ruling in Brown v. Board of Education. Behind every event that has spawned controversy is a profile in courage. It was not a simple decision for the players in the scenario of the Brown v. Board of Education case to step forward and present themselves as evidence of discrimination. Black parents supported by black organizations viewed this legal action as a chance for equal opportunity. Yet, the 1950s were a time when black

communities were pained by the thought that bigotry and institutional racism would forever stand in the way of their achieving equality.

Assistive Technology Assessment Handbook Stefano Federici 2017-11-23 *Assistive Technology Assessment Handbook, Second Edition*, proposes an international ideal model for the assistive technology assessment process, outlining how this model can be applied in practice to re-conceptualize the phases of an assistive technology delivery system according to the biopsychosocial model of disability. The model provides reference guidelines for evidence-based practice, guiding both public and private centers that wish to compare, evaluate, and improve their ability to match a person with the correct technology model. This second edition also offers a contribution to the Global Cooperation on Assistive Technology (GATE) initiative, whose activities are strongly focused on the assistive products service delivery model. Organized into three parts, the handbook: gives readers a toolkit for performing assessments; describes the roles of the assessment team members, among them the new profession of psychotechnologist; and reviews technologies for rehabilitation and independent living, including brain-computer interfaces, exoskeletons, and technologies for music therapy. Edited by Stefano Federici and Marcia J. Scherer, this cross-cultural handbook includes contributions from leading experts across five continents, offering a framework for future practice and research.
