**Analyzing Elections** Rebecca B. Morton 2006 It begins by examining the roles of the basic actors in elections—voters, candidates, parties and interest groups—and the institutional process through which the actors move. The analytical techniques presented in the first part of the book are then applied to questions about the effects of money and the mass media on electoral outcomes, the extent to which elections can control errant officials, and the problems of measuring public opinion and preferences. Special attention is devoted to the unique issues involved in the congressional redistricting as well as presidential primaries and the Electoral College. The analysis is extended to consider the roles played by my minor party and independent candidates and the problems minorities face in achieving representation in the American electoral process.

**Message and Medium** Caroline Tagg 2020-05-18 Studies of digital communication technologies often focus on the apparently unique set of multimodal resources afforded to users and the development of innovative linguistic strategies for performing mediatised identities and maintaining online social networks. This edited volume interrogates the novelty of such practices by establishing a transhistorical approach to the study of digital communication. The transhistorical approach explores language practices as lived experiences grounded in historical contexts, and aims to identify those elements of human behaviour that

transcend historical boundaries, looking beyond specific developments in communication technologies to understand the enduring motivations and social concerns that drive human communication. The volume reveals long-term patterns in the indexical functions of seemingly innovative written and multimodal resources and the ideologies that underpin them, and shows that methods are not necessarily contingent on their datasets: historical analytic frameworks can be applied to digital data and newer approaches used to understand historical data. These insights present exciting opportunities for English language researchers, both historical and modern.

**War on Film** Michael T. Isenberg 1981

Eliminating Racism Phyllis A. Katz 2013-06-29 The chapters presented here provide the reader with an awareness of the divergent views of what constitutes racism and frameworks for reducing it. This book points out that the dialogue and research on this subject since the mid-1970s have yielded increased controversy over the theories, foundation, and continued existence of racism. Ironically, what we viewed in the 1954 Brown decision and the Civil Rights Act of 1964 as the beginning of the end of racism turned out to be the beginning of confusion over the course of action to ensure societal acceptance of political mandates. Hence, the title of this book captures the essence of the emotional core of any forum for examining racism, past and present. One of the most controversial forums has been that of education, beginning with the D.S. Supreme Court's 1954 ruling in *Brown v. Board of Education*. Behind every event that has spawned controversy is a profile in courage. It was not a simple decision for the players in the scenario of the *Brown v. Board of Education* case to step forward and present themselves as evidence of discrimination. Black parents supported by black organizations viewed this legal action as a chance for equal opportunity. Yet, the 1950s were a time when black communities were pained by the thought that bigotry and institutional racism would forever stand in the way of their achieving equality.

*Migrant Integration Between Homeland and Host Society Volume 1*

Agnieszka Weinar 2017-05-23 This book provides a theoretical framing to analyse and examine the interaction between origin and destination in the migrant integration process. Coverage offers a set of concrete conceptual tools, which can be operationalised when measuring integration. This title is the first of two complementary volumes, each of

which is designed to stand alone and provide a different approach to the topic. Here, the chapters offer a detailed look at integration across eight key areas: labour, education, language and culture, civic and political participation, housing, social ties, religion, and access to citizenship. Readers are presented with an examination into the globally available knowledge on interactions between emigration/diaspora policies on one hand and integration policies on the other. Migrants actively belong to two places: the land they left behind and the home they are seeking to build. This book gives an insightful argument for the need to include information about countries and communities of origin when examining integration, which is often overlooked. It will appeal to academics, policymakers, integration practitioners, civil society organisations, as well as students. Overall, the chapters establish a cohesive analytical framework to this important topic. A complementary volume: *Migrant Integration between Homeland and Host Society Volume 2: How countries of origin impact migrant integration outcomes: an analysis*, edited by A. Di Bartolomeo, S. Kalantaryan, J. Salamonska and P. Fargues builds upon this foundation and presents an empirical approach to migrant integration.

Honest to Greatness Peter Kozodoy 2020-08-11 In today's hyper-transparent world, consumers have enormous power to decide which brands are worth their time and money—so how do you make sure they choose yours? Unfortunately, most leaders and organizations are stuck following archaic, detrimental business practices. Meanwhile, savvy consumers and employees across every generation are making their stance perfectly clear: They are not interested in supporting organizations that seem inauthentic, soulless, or untrustworthy. In this environment, only the honest will survive. In *Honest to Greatness*, serial Inc. 5000 entrepreneur Peter Kozodoy shows how today's greatest business leaders use honesty—not as a touchy-feely core value, but as a business strategy that produces game-changing, industry-dominating success. Through case studies and interviews with leaders at Bridgewater Associates, Sprint, Quicken Loans, Domino's, The Ritz-Carlton, and more, Kozodoy presents fresh business concepts that

anyone in the workplace can implement in order to: • Reach, engage, and retain your best customers • Attract and inspire the best talent in any industry • Create an unbeatable culture of innovation that dominates your competitors • Earn your team's respect and loyalty • Unlock deep personal fulfillment by setting the "right" goals Filled with powerful lessons for current and future leaders, this timely book demonstrates how to use honesty at both the organizational and individual level to achieve true greatness in business and in life.

The Web as History Niels Brügger 2017-03-06 The World Wide Web has now been in use for more than 20 years. From early browsers to today's principal source of information, entertainment and much else, the Web is an integral part of our daily lives, to the extent that some people believe 'if it's not online, it doesn't exist.' While this statement is not entirely true, it is becoming increasingly accurate, and reflects the Web's role as an indispensable treasure trove. It is curious, therefore, that historians and social scientists have thus far made little use of the Web to investigate historical patterns of culture and society, despite making good use of letters, novels, newspapers, radio and television programmes, and other pre-digital artefacts. This volume argues that now is the time to ask what we have learnt from the Web so far. The 12 chapters explore this topic from a number of interdisciplinary angles - through histories of national web spaces and case studies of different government and media domains - as well as an introduction that provides an overview of this exciting new area of research.

*The Fictional Dimension of the School Shooting Discourse* Silke Braselmann 2019-06-17 Ever since the 1990s, school shootings have shocked the public in their brutality, their suddenness, and their inexplicability. While film and literature have played a role in the heated debates about so-called copycat crimes, the growing body of

fictionalizations of school shootings has been neglected thus far. However, in a discourse in which the boundaries between fiction and reality are increasingly blurred, this book shows how fiction shapes and structures, challenges and disrupts cultural processes of meaning-making. Hence, for a better understanding of the school shooting phenomenon, the relevance of fiction on all levels of discourse construction requires thorough analysis. This book therefore develops a new approach to the role of fiction for contemporary forms of excessive violence. By combining narrative theory with insights from sociology and other disciplines, it provides the means for apprehending and describing the relevance of fiction for contemporary discourses. Furthermore, it provides exemplary analyses of more specific functions of literary and filmic fictionalizations of school shootings between 2000 and 2016.

Thank the loving God revealed in the pages of *Setting God Free* that Seán Ólaoire has finally unpacked the horror show known as "the difficult passages" of the Bible, giving readers access to a cosmology built not on canonical scripture alone, but also on science, spirituality, and personal experience. And as for the God we humans have created in our own image? His day in court has finally come.

**Twelve Years a Slave** Solomon Northup 2021-01-01 "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Eat My Dust Georgine Clarsen 2008-08-26 The history of the automobile would be incomplete without considering the influence of the car on the lives and careers of women in the earliest decades of the twentieth century. Illuminating the relationship between women and cars with case studies from across the globe, *Eat My Dust* challenges the received wisdom that men embraced automobile technology more naturally than did women. Georgine Clarsen highlights the personal stories of women from the United States, Britain, Australia, and colonial Africa from the early days of motoring until 1930. She notes the different ways in which these women embraced automobile technology in their national and cultural context. As mechanics and taxi drivers -- like Australian Alice Anderson and Brit Sheila O'Neil -- and long-distance adventurers and political activists -- like South Africans Margaret Belcher and Ellen Budgell and American suffragist Sara Bard Field -- women sought to define the technology in their own terms and according to their own needs. They challenged traditional notions of femininity through their love of cars and proved they were articulate, confident, and mechanically savvy motorists in their own right. More than new chapters in automobile history, these stories locate women motorists within twentieth-century debates about class, gender, sexuality, race, and nation. -- Deborah Clarke

The Making of Modern Burma Thant Myint-U 2001-03-26 Burma has often been portrayed as a timeless place, a country of egalitarian Buddhist villages, ruled successively by autocratic kings, British

colonialists and, most recently, a military dictatorship. *The Making of Modern Burma* argues instead that many aspects of Burmese society today, from the borders of the state to the social structure of the countryside to the very notion of a Burmese identity, are largely the creations of the nineteenth century - a period of great change - away from the Ava-based polity of early modern times, and towards the 'British Burma' of the 1900s. The book provides a sophisticated and much-needed account of the period, and as such will be an important resource for policy makers and students as a basis for understanding contemporary politics and the challenges of the modern state. It will also be read by historians interested in the British colonial expansion of the nineteenth century.

*Free Slaves, Freetown, and the Sierra Leonean Civil War* Joseph Kaifala

2016-11-22 This book is a historical narrative covering various periods in Sierra Leone's history from the fifteenth century to the end of its civil war in 2002. It entails the history of Sierra Leone from its days as a slave harbor through to its founding as a home for free slaves, and toward its political independence and civil war. In 1462, the country was discovered by a Portuguese explorer, Pedro de Sintra, who named it Serra Lyoa (Lion Mountains). Sierra Leone later became a lucrative hub for the Transatlantic Slave Trade. At the end of slavery in England, Freetown was selected as a home for the Black Poor, free slaves in England after the Somerset ruling. The Black Poor were joined by the Nova Scotians, American slaves who supported or fought with the British during the American Revolution. The Maroons, rebellious slaves from Jamaica, arrived in 1800. The Recaptives, freed in enforcement of British antislavery laws, were also taken to Freetown. Freetown became a British colony in 1808 and Sierra Leone obtained political independence from Britain in 1961. The development of the country was derailed by the death of its first Prime Minister, Sir Milton Margai, and thirty years after independence the country collapsed into a brutal civil war.

*The Unwanted Europeanness?* Branislav Radeljić 2021-01-18 Can we be optimistic about the future of Europe? To what extent has the European integrationist project affected the discourse about the core and the (semi-)periphery? Why does the European Union struggle with its own, and the neighbouring, Other? These are some of the questions addressed in this thought-provoking volume about the dilemmas surrounding the ever-uncertain European unity. A wide range of contributors have drawn upon invaluable sources and data to examine a broad selection of official discords and discrepancies characterizing the EU's relations with the Balkans, East-Central Europe, and beyond. Moreover, past events have shaped present political and socioeconomic cooperation (or its deficiencies), with no reason to believe that these present challenges will not further influence future arrangements at a supranational or intergovernmental level. Whichever the period, questions of belonging, solidarity, and the (un)wanted Other have remained relevant and have continued to penetrate discussions. In addition to complementing the existing analyses of European developments, the present findings are of great relevance for researchers, policymakers, and general readership. In fact, they are essential if we want to see Europe develop.

*Modern Music and After* Paul Griffiths 2011-02-16 Over three decades, Paul Griffiths's survey has remained the definitive study of music since the Second World War; this fully revised and updated edition re-establishes *Modern Music and After* as the preeminent introduction to the music of our time. The disruptions of the war, and the struggles of the ensuing peace, were reflected in the music of the time: in Pierre Boulez's radical reformation of compositional technique and in John Cage's development of zen music; in Milton Babbitt's settling of the serial system and in Dmitry Shostakovich's unsettling symphonies; in Karlheinz Stockhausen's development of electronic music and in Luigi Nono's pursuit of the universally human, in Iannis Xenakis's view of music as sounding mathematics and in Luciano Berio's consideration of it

as language. The initiatives of these composers and their contemporaries opened prospects that haven't yet stopped unfolding. This constant expansion of musical thinking since 1945 has left us with no singular history of music; Griffiths's study accordingly follows several different paths, showing how and why they converge and diverge. This new edition of *Modern Music and After* discusses not only the music of the fifteen years that have passed since the previous edition, but also the recent explosion of scholarly interest in the latter half of the twentieth century. In particular, the book has been expanded to incorporate the variety of responses to the modernist impasse experienced by composers of the 1980s and 1990s. Griffiths then moves the book into the twenty-first century as he examines such highly influential composers as Helmut Lachenmann and Salvatore Sciarrino. For its breadth, wealth of detail, and characteristic wit and clarity, the third edition of *Modern Music and After* is required reading for the student and the enquiring listener.

*Imagining Outer Space* Alexander C.T. Geppert 2012-02-07 *Imagining Outer Space* makes a captivating advance into the cultural history of outer space and extraterrestrial life in the European imagination. How was outer space conceived and communicated? What promises of interplanetary expansion and cosmic colonization propelled the project of human spaceflight to the forefront of twentieth-century modernity? In what way has West-European astroculture been affected by the continuous exploration of outer space? Tracing the thriving interest in spatiality to early attempts at exploring imaginary worlds beyond our own, the book analyzes contact points between science and fiction from a transdisciplinary perspective and examines sites and situations where utopian images and futuristic technologies contributed to the omnipresence of fantasmatic thought. Bringing together state-of-the-art work in this emerging field of historical research, the volume breaks new ground in the historicization of the Space Age.

*Major Legal Systems in the World Today* René David 1978 A significant introduction to the study of comparative law and a notable scholarly work, "Major Legal Systems in the World Today" analyzes the general characteristics which lie behind the development of the four principal

unique insights into the spirit of each "legal family, " the book presents a total view of the historical foundation and the sources and structure of the law in each system.
