Jonathan Strahan is a veteran anthology editor, and this Infinity Project series is intended to trace an arc from near-future to far-future in all-original hard-sf. These are not re-prints! Now, in my mind, hard-sf should be science fiction that emphasizes the hard sciences - physics, chemistry, space, and the natural sciences.

According to Jonathan Strahan's introduction, Engineering Infinity (2010) is intended to be a survey of the state of hard sf short fiction at the beginning of the 21st century. Specific writers targeted, indeed if one looks at the table of contents there are several (white males) known for their realistic extrapolation on theory.

The editor, Jonathan Strahan, outlines the history of science fiction from Hugo Gernsback to the present. The field has matured beyond the restrictions of early hard science fiction and become something wider, richer, and apparently harder to define. What about the stories? " [S]ome of the stories are classic hard SF, some are not.
