beginners and seasoned academics alike. Contributions from over fifty experts and practitioners provide an accessible introduction to these disciplines' most important concepts, figures, and schools of thought – from Jean Baudrillard to Tim Berners Lee, and podcasting to Peircean semiotics. Detailed and up-to-date, the Encyclopedia of Media and Communication synthesizes a wide array of works and perspectives on the making of meaning. The appendix includes timelines covering the whole historical record for each medium, from either antiquity or their inception to the present day. Each entry also features a bibliography linking readers to relevant resources for further reading. The most coherent treatment yet

of these fields, the Encyclopedia of Media and Communication promises to be the standard reference text for the next generation of media and communication students and scholars.

print culture and social experience, Bronwen Wilson's *The World in Venice* focuses on the printed image during a century of profound transformation. City views, costume illustrations, events, and portraits of locals and foreigners are brought together to show how printmakers responded to an expanding image of the world in Renaissance Venice, and how, in turn, prints influenced the ways in which individuals thought about themselves. Woodcuts and engravings of cities and inhabitants of Europe, and those of distant lands, initiated a sudden and pervasive experience with alterity that redefined the relations of Europeans to the world. By condensing the world into pictures, print enabled a radically

novel and vicarious experience of others. Wilson explores the overlapping and evolving relations between space, vision, print, and identity, and engages with current scholarly debates concerning ethnicities, gender and geography, copies and originals, travel, nationhood, fashion, urban life, visuality, and the body. Venice was one of the largest cities in Renaissance Europe, a trading crossroads, and a centre of print. *The World in Venice* shows how Venetian identity came to be envisioned within the growing global context that print constructed for it. literary tradition at large. It builds on current debates aiming to redefine 'modernism' in connection to concepts such as 'late modernism' or 'postmodernism'. Instead of definitively re-categorizing Beckett under any of these labels, the essays use his diverse oeuvre – encompassing poetry, criticism, prose, theatre, radio and film – as a case study to investigate and reassess the concept of 'modernism after postmodernism' in all its complexity, covering a broad range of topics spanning Beckett's entire career. In addition to more thematic essays about art, history, politics, psychology and philosophy, the collection places his work in relation to that of other modernists such as T. S. Eliot, James

Joyce, Wyndham Lewis, Gertrude Stein and Virginia Woolf, as well as to the literary canon in general. It represents an important contribution to both Beckett studies and modernism studies. *Bibliography of Publications* George Washington University. Human Resources Research Office 1960

Beckett at 100 Linda Ben-Zvi 2008-01-08 To commemorate the centenary of the birth of Samuel Beckett, this book, containing essays by leading international scholars, rethinks traditional critical assumptions, readings, and theories concerning the Beckett canon, and reassesses his impact on the modern imagination and legacy to future generations.

The Rise of Eurocentrism

Vassilis Lambropoulos 2019-10-08 In the controversy over political correctness, the canon, and the curriculum, the role of Western tradition in a post-modern world is often debated. To clarify what is at stake, Vassilis Lambropoulos traces the ideology of European culture from the Reformation, focusing on a key element of Western tradition: the act of interpretation as a distinct practice of understanding and a civil right. Championed by Protestants insisting on independent interpretation of scripture, this ideal of

autonomy ushered in the era of modernity with its essentialist philosophy of universal man and his aesthetic understanding of the world. After explaining the dominance of European culture through the combined archetypes of Hebraism (reason and morality) and Hellenism (spirit and art), Lambropoulos shows how the rule of autonomy has been transformed into the aesthetic, disinterested contemplation of things in themselves. Arguing that it is time to restore the socio-political dimension to the movement of autonomy, he proposes that a genealogy of the Hebraic-Hellenic archetypes can help us evaluate more recent models--like the Afrocentric one--and redefine the controversy surrounding education, Eurocentrism, and

cultural politics.

The Birth of the Modern Mind Paul Oppenheimer 1989 This revolutionary study presents new facts and an original theory on the origin of the thought and literature that may be considered "modern." Oppenheimer argues that modern thought and literature were born with the invention of the sonnet in 13th-century Italy.

Messages, Signs, and Meanings Marcel Danesi 2004
Messages, Signs, and Meanings can be used directly in introductory courses in semiotics, communications, media, or culture studies. Additionally, it can be used as a complementary or supplementary text in courses dealing with cognate areas of investigation (psychology, mythology, education, literary studies, anthropology, linguistics). The text builds upon what readers already know intuitively about signs, and then leads them to think critically about the world in which they live

- a world saturated with images of all kinds that a basic knowledge of semiotics can help filter and deconstruct. The text also provides opportunities for readers to do "hands-on" semiotics through the exercises and questions for discussion that accompany each chapter. Biographical sketches of the major figures in the field are also included, as is a convenient glossary of technical terms. The overall plan of the book is to illustrate how message-making and meaning-making can be studied from the specific vantage point of the discipline of semiotics. This third edition also includes updated discussions of information technology throughout, focusing especially on how meanings are now negotiated through such channels as websites.

Bwiti J. W. Fernandez 2019-01-29 We cannot, the author argues, adequately understand the religious

imagination without knowing the historical, social, and cultural matrices from which it arises. Accordingly, his book explores the Fang culture of Gabon as a set of contexts from which emerges the Bwiti religion. In addition to experience with missionary Christianity, Bwiti uses a great reservoir of images and ideas from its own past. Professor Fernandez analyzes how they are recreated into a compelling religious universe, an equatorial microcosm. Part I, a detailed ethnographic account of Fang culture after colonial encounter, addresses the attendant problems. The author discusses the European influence on the self-concept of the Fang, family life and kinship, and political and economic relationships. Part II analyzes in greater

detail the religious implications of European administration and missionary efforts. In Part III the author shows how the malaise and increasing isolation of part of Fang culture achieve some assuagement of the Bwiti religion, which seeks a reconciliation of the past and present. James W. Fernandez is Professor of Anthropology at Princeton University and author of many studies in this discipline. Originally published in 1982. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and

2018-11-16 The original essays in this volume discuss ideas relating to democracy, political justice, equality and inequalities in the distribution of resources and public goods. These issues were as vigorously debated at the height of ancient Greek democracy as they are in many democratic societies today. Contributing authors address these issues and debates about them from both philosophical and historical perspectives. Readers will discover

research on the role of Athenian democracy in moderating economic inequality and reducing poverty, on ancient debates about how to respond to inborn and social inequalities, and on Plato's and Aristotle's critiques of Greek participatory democracies. Early chapters examine Plato's views on equality, justice, and the distribution of political and non-political goods, including his defense of the abolition of private property for the ruling classes and of the equality of women in his ideal constitution and polis. Other papers discuss views of Socrates or Aristotle that are particularly relevant to contemporary political and economic disputes about punishment, freedom, slavery, the status of women, and public

education, to name a few. This thorough consideration of the ancient Greeks' work on democracy, justice, and equality will appeal to scholars and researchers of the history of philosophy, Greek history, classics, as well as those with an interest in political philosophy.

Mediterranean basin in the long 19th century. In bringing together leading historians working on Southern Europe, the Balkans, and the Ottoman Empire for the first time, it builds bridges across national historiographies, raises a number of comparative questions and unveils unexplored intellectual connections and ideological formulations. The book shows that in the so-called age of nationalism the idea of the nation state was by no means dominant, as displaced intellectuals and migrant communities developed notions of double national

affiliations, imperial patriotism and liberal imperialism. By adopting the Mediterranean as a framework of analysis, the collection offers a fresh contribution to the growing field of transnational and global intellectual history, revising the genealogy of 19th-century nationalism and liberalism, and reveals new perspectives on the intellectual dynamics of the age of revolutions. **Beckett and Zen** Paul Foster 1989 Applies an understanding of Zen Buddhism to the 'absurdity' of Beckett, which is seen as an expression of deepest spiritual anguish. *Lucretius and Epicurus* Diskin Clay 1983
