**Topology in Magnetism** Jiadong Zang 2018-09-24 This book presents both experimental and theoretical aspects of topology in magnetism. It first discusses how the topology in real space is relevant for a variety of magnetic spin structures, including domain walls, vortices, skyrmions, and dynamic excitations, and then focuses on the phenomena that are driven by distinct topology in reciprocal momentum space, such as anomalous and spin Hall effects, topological insulators, and Weyl semimetals. Lastly, it examines how topology influences dynamic phenomena and excitations (such as spin waves, magnons, localized dynamic solitons, and Majorana fermions). The book also shows how these developments promise to lead the transformative revolution of information technology.

**The Politics of Climate Change and Uncertainty in India** Lyla Mehta 2021-12-23 This book brings together diverse perspectives concerning uncertainty and climate change in India. Uncertainty is a key factor shaping climate and environmental policy at international, national and local levels. Climate change and events such as cyclones, floods, droughts and changing rainfall patterns create uncertainties that planners, resource managers and local populations are regularly confronted with. In this context, uncertainty has emerged as a "wicked problem" for scientists and policymakers, resulting in highly debated and disputed decision-making.

The book focuses on India, one of the most climatically vulnerable countries in the world, where there are stark socio-economic inequalities in addition to diverse geographic and climatic settings. Based on empirical research, it covers case studies from coastal Mumbai to dryland Kutch and the Sundarbans delta in West Bengal. These localities offer ecological contrasts, rural-urban diversity, varied exposure to different climate events, and diverse state and official responses. The book unpacks the diverse discourses, practices and politics of uncertainty and demonstrates profound differences through which the "above", "middle" and "below" understand and experience climate change and uncertainty. It also makes a case for bringing together diverse knowledges and approaches to understand and embrace climate-related uncertainties in order to facilitate transformative change. Appealing to a broad professional and student audience, the book draws on wide-ranging theoretical and conceptual approaches from climate science, historical analysis, science, technology and society studies, development studies and environmental studies. By looking at the intersection between local and diverse understandings of climate change and uncertainty with politics, culture, history and ecology, the book argues for plural and socially just ways to tackle climate change in India and beyond.

**A Mathematician's Apology** G. H. Hardy 1992-01-31 G. H. Hardy was one of this century's finest mathematical thinkers, renowned among his

contemporaries as a 'real mathematician ... the purest of the pure'. He was also, as C. P. Snow recounts in his Foreword, 'unorthodox, eccentric, radical, ready to talk about anything'. This 'apology', written in 1940 as his mathematical powers were declining, offers a brilliant and engaging account of mathematics as very much more than a science; when it was first published, Graham Greene hailed it alongside Henry James's notebooks as 'the best account of what it was like to be a creative artist'. C. P. Snow's Foreword gives sympathetic and witty insights into Hardy's life, with its rich store of anecdotes concerning his collaboration with the brilliant Indian mathematician Ramanujan, his aphorisms and idiosyncrasies, and his passion for cricket. This is a unique account of the fascination of mathematics and of one of its most compelling exponents in modern times.

*Biotechnology of Biopolymers* Alexander Steinbüchel 2005 The best of the "Biopolymers" series. Since only a small number of individuals can afford to buy the entire Biopolymers series, or would simply prefer a broader overview, this handbook contains the very best of biotechnology, with articles taken directly from Alexander Steinbüchel's successful series. As such, these two volumes cover the entire range of biopolymers and not just one chemical class, with the focus on the biotechnological systems and processes under development for a cost effective production, isolation and modification of biopolymers. Furthermore it covers the fundamentals of their chemical and physical properties, their occurrence, metabolism, biosynthesis and biodegradation as well as their industrial applications as renewable resources, novel materials and technical applications. With its contributions similarly structured for easy data comparison and an extensive table of patents, this is an ideal reference for medium sized laboratories and libraries.

*With the Persian Expedition* Martin Henry Donohoe 2020-10-11 Exerpt from the book Well, chiefly because in the beginning of 1918 Fate and the War Office sent me into a field of operations almost unknown and unheeded of the average home keeping Briton - via, that of north-west Persia, in the land lying towards the Caucasus and the Caspian Sea; and my experiences there led me into bypaths of the Great War so unusual as to seem well worth describing, quite apart from the military importance of the movements of which they were but a minute part. However, in the latter aspect, too, I hope my book will serve as a useful footnote to the history of the gigantic struggle now happily ended.

**Twelve Years a Slave** Solomon Northup 2021-01-01 "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested

that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

**An Introduction to the Philosophy of Mind** Keith Maslin 2007-07-16 An

Introduction to the Philosophy of Mind provides a lively and accessible introduction to all the main themes and arguments currently being debated in this area. The book examines and criticizes four major theories of mind:

Dualism, Mind/Brain Identity, Behaviourism and Functionalism. It argues

that while consciousness and our mental lives depend upon physical processes in the brain, they are not reducible to those processes. The

differences between mental and physical states, mind/body causality, the

problem of other minds, and personal identity are also explored in full. The

second edition of this well respected text has been revised to include a

new chapter which explores Aristotle's philosophy of psychology and mind.

It also includes new material on the Turing test and has been expanded

and updated throughout. The book is designed to help students think for

themselves about all the issues identified above, and contains exercises

throughout the text to stimulate and challenge the reader. Objectives are

clearly set out at the start of every chapter to enable students to check

their understanding as they proceed, and each chapter ends with

questions to consider. There are discussions of the most cited

contemporary writers in the field, so that the reader can gain a rounded

perspective of the debates.

**From Proto-Indo-European to Proto-Germanic** Donald Ringe 2008 This

book is the first since 1897 to describe the earliest reconstructable stages

of the prehistory of English. It outlines the grammar of Proto-Indo-

European, considers the changes by which one dialect of that prehistoric

language developed into Proto-Germanic, and provides a detailed account

of the grammar of Proto-Germanic. The first volume in Don Ringe's A

Linguistic History of English will be of central interest to all scholars and

students of comparative Indo-European and Germanic linguistics, the

history of English, and historical linguists. The next volume will consider

the development of Proto-Germanic into Old English. Subsequent volumes

will describe the attested history of English from the Old English period to

the present.

Pollution Prevention and Abatement Handbook, 1998 1999 "Originally

developed to help staff, clients, and consultants prepare and implement

operations supported by the Bank Group, this Handbook updates and

replaces the Environmental Guidelines issued in 1988 and reflects

changes both in technology and in pollution management policies and

practices. It focuses attention on the environmental and economic benefits

of preventing pollution and emphasizes cleaner production and good

management techniques."--BOOK JACKET.
