Mapping Landscapes for Performance as Research Shannon Rose Riley 2009-07-16 Although the sciences have long understood the value of practice-based research, the arts and humanities have tended to structure a gap between practice and analysis. This book examines differences and similarities between Performance as Research practices in various community and national contexts, mapping out the landscape of this new field.

Artistic Citizenship Marissa Silverman 2016-10-04 This first-of-its-kind compendium unites perspectives from artists, scholars, arts educators, policymakers, and activists to investigate the complex system of values surrounding artistic-educational endeavors. Addressing a range of artistic domains-including music, dance, theater, visual arts, film, and poetry-contributors explore and critique the conventions that govern our interactions with these practices. Artistic Citizenship focuses on the social responsibilities and functions of amateur and professional artists and examines ethical issues that are conventionally dismissed in discourses on these topics. The questions this book addresses include: How does the concept of citizenship relate to the arts? What sociocultural, political, environmental, and gendered "goods" can artistic engagements create for people worldwide? Do particular artistic endeavors have distinctive potentials for nurturing artistic citizenship? What are the most effective strategies in the arts to institute change and/or resist local, national, and world problems? What obligations do artists and consumers of art have to facilitate relationships between the arts and citizenship? How can artistic activities contribute to the eradication of adverse 'ism's? A substantial accompanying website features video clips of "activism" in action, videotaped interviews with scholars and practitioners working in a variety of spaces and places, a blog, and supplementary resources about existing and emerging initiatives. Thoroughly researched and engagingly written, Artistic Citizenship is an essential text for artists, scholars, policymakers, educators, and students.

Reading Song Lyrics Lars Eckstein 2010-01-01 Reading Song Lyrics offers the first systematic introduction to lyrics as a vibrant genre of (performed) literature. It takes lyrics seriously as a complex form of verbal art that has been unjustly neglected in literary, music, and, to a lesser degree, cultural studies, partly as it cuts squarely across institutional boundaries. The first part of this book accordingly introduces a thoroughly transdisciplinary interpretive framework. It outlines theoretical approaches to issues such as performance and performativity, generic convention and cultural capital, sound and songfulness, mediality and musical multimedia, and step by step applies them to the example of a single song. The second part then offers three extended case studies which showcase the larger cultural and historical viability of this model. Probing into the relationship between lyrics and the ambivalent performance of national culture in Britain, it offers exemplary readings of a highly subversive 1597 ayre by John Dowland, of an 1811 broadside ballad about Sara Baartman, 'The Hottentot Venus', and of a 2000 song by 'jungle punk' collective Asian Dub Foundation. Reading Song Lyrics demonstrates how and why song lyrics matter as a paradigmatic art form in the culture of modernity.

Improvisation and Social Aesthetics Georgina Born 2017-03-03 Addressing a wide range of improvised art and music forms—from jazz and cinema to dance and literature—this volume's contributors locate improvisation as a key site of mediation between the social and the aesthetic. As a catalyst for social experiment and political practice, improvisation aids in the creation, contestation, and codification of social realities and identities. Among other topics, the contributors discuss the social aesthetics of the Association for the Advancement of Creative Musicians, the Feminist Improvising Group, and contemporary Malian music, as well as the virtual sociality of interactive computer music, the significance of "uncreative" improvisation, responses to French New Wave cinema, and the work of figures ranging from bell hooks and Billy Strayhorn to Kenneth Goldsmith. Across its diverse chapters, Improvisation and Social Aesthetics argues that ensemble improvisation is not inherently egalitarian or emancipatory, but offers a potential site for the cultivation of new forms of social relations. It sets out a new conceptualization of the aesthetic as immanently social and political, proposing a new paradigm of improvisation studies that will have reverberations throughout the humanities. Personalised Health Care Stefania Boccia 2020-11-23 Practitioners are increasingly adopting a personalised medicine approach to individually tailored patient care, especially disease diagnosis and treatment with the use of biomarkers. However, development and implementation of such approaches to chronic disease prevention need further investigation and concerted efforts for proper use in healthcare systems. This book provides high-quality, multidisciplinary knowledge from research in personalised medicine, specifically personalised prevention of

chronic disease. It addresses different perspectives of prevention in the field, and is the outcome of a four-year work of the Personalized prevention of Chronic Disease (PRECeDI) Consortium, a multi-disciplinary and multi-professional team of experts. The Consortium jointly agreed to document and address the five aspects or domains of personalised medicine and prevention as individual chapters: Identification of biomarkers for the prevention of chronic disease Evaluation of predictive genomic applications Ethico-legal and policy issues surrounding personalised medicine Roles and responsibilities of stakeholders in informing healthy individuals on their genome: a sociotechnical analysis Identification of organisational models for the provision of predictive genomic applications The book focuses on the Consortium's recommendations that are derived from each of these domains based on up-to-date evidence and research that the authors write, follow, and systematically organise and report. Personalisation of health care is, eventually, a driver of innovation in research and healthcare systems. With this SpringerBrief on Personalised Health Care: Fostering Precision Medicine Advancements for Gaining Population Health Impact, the Consortium provides further evidence of the clinical validity and utility of personalised medicine with special emphasis on the prevention of chronic diseases. The book is a useful resource for policy makers, industry and healthcare professionals, scientists, technology-sector professionals, investors, citizens, and private companies that need proper advice to realise the potential of personalised medicine.

Expanding the Frontiers of Visual Analytics and Visualization John Dill 2012-04-17 The field of computer graphics combines display hardware, software, and interactive techniques in order to display and interact with data generated by applications. Visualization is concerned with exploring data and information graphically in such a way as to gain information from the data and determine significance. Visual analytics is the science of analytical reasoning facilitated by interactive visual interfaces. Expanding the Frontiers of Visual Analytics and Visualization provides a review of the state of the art in computer graphics, visualization, and visual analytics by researchers and developers who are closely involved in pioneering the latest advances in the field. It is a unique presentation of multi-disciplinary aspects in visualization and visual analytics, architecture and displays, augmented reality, the use of color, user interfaces and cognitive aspects, and technology transfer. It provides readers with insights into the latest developments in areas such as new displays and new display processors, new collaboration technologies, the role of visual, multimedia, and multimodal user interfaces, visual analysis at extreme scale, and adaptive visualization.

The Geek's Chihuahua Ian Bogost 2015-04-22 At dinnertime: check. At a traffic light: check. In bed at the end of the day: check. In line at the coffee shop: check. In *The Geek's Chihuahua*, Ian Bogost addresses the modern love affair of "living with Apple" during the height of the company's market influence and technology dominance. The ubiquitous iPhone and its kin saturate our lives, changing everything from our communication to our posture. Bogost contrasts the values of Apple's massive success in the twenty-first century with those of its rise in the twentieth. And he connects living with Apple with the phenomenon of "hyperemployment"--the constant overwork of today's technological life that all of us now experience. Bogost also reflects on the new potential function--as well as anxiety and anguish--of devices like the Apple Watch. We are tethered to our devices, and, as Bogost says: that's just life--anxious, overworked, and utterly networked life. *Forerunners: Ideas First* is a thought-in-process series of breakthrough digital publications. Written between fresh ideas and finished books, *Forerunners* draws on scholarly work initiated in notable blogs, social media, conference plenaries, journal articles, and the synergy of academic exchange. This is gray literature publishing: where intense thinking, change, and speculation take place in scholarship.

Setting God Free Seán Ólaoire 2021-07-07 A priest, a scientist, and a psychologist walk into a bar... This isn't the beginning of a joke. It's the start of a long-overdue conversation about how mainstream religion has handed down a God that only a sadomasochist could love. How are we supposed to worship a deity who wantonly slaughters

innocents to assuage His own bloodthirsty rage? Thank the loving God revealed in the pages of *Setting God Free* that Seán Ólaoire has finally unpacked the horror show known as "the difficult passages" of the Bible, giving readers access to a cosmology built not on canonical scripture alone, but also on science, spirituality, and personal experience. And as for the God we humans have created in our own image? His day in court has finally come. **The Namesake** Jhumpa Lahiri 2007-03 Gogol is named after his father's favourite author. But growing up in an Indian family in suburban America, the boy starts to hate his name and itches to cast it off, along with the inherited values it represents. Gogol sets off on his own path only to discover that the search for identity depends on much more than a name.

Film and the City George Melnyk 2014-05-01 Most Canadians are city dwellers, a fact often unacknowledged by twentieth-century Canadian films, with their preference for themes of wilderness survival or rural life. Modernist Canadian films tend to support what film scholar Jim Leach calls "the nationalist-realist project," a documentary style that emphasizes the exoticism and mythos of the land. Over the past several decades, however, the hegemony of Anglo-centrism has been challenged by francophone and First Nations perspectives and the character of cities altered by a continued influx of immigrants and the development of cities as economic and technological centers. No longer primarily defined through the lens of rural nostalgia, Canadian urban identity is instead polyphonic, diverse, constructed through multiple discourses and mediums, an exchange rather than a strict orientation. Taking on the urban as setting and subject, filmmakers are ideally poised to create and reflect multiple versions of a single city. Examining fourteen Canadian films produced from 1989 to 2007, including Denys Arcand's *Jésus de Montréal* (1989), Jean-Claude Lauzon's *Léolo* (1992), Mina Shum's *Double Happiness* (1994), Clément Virgo's *Rude* (1995), and Guy Maddin's *My Winnipeg* (2007), *Film and the City* is the first comprehensive study of Canadian film and "urbanity"—the totality of urban culture and life. Drawing on film and urban studies and building upon issues of identity formation in Canadian studies, Melnyk considers how filmmakers, films, and urban audiences experience, represent, and interpret urban spatiality, visuality, and orality. In this way, *Film and the City* argues that Canadian narrative film of the postmodern period has aided in articulating a new national identity.

Sound - Perception - Performance Rolf Bader 2013-05-23 *Musical Performance* covers many aspects like Musical Acoustics, Music Psychology, or motor and prosodic actions. It deals with basic concepts of the origin of music and its evolution, ranges over neurocognitive foundations, and covers computational, technological, or simulation solutions. This volume gives an overview about current research in the foundation of musical performance studies on all these levels. Recent concepts of synchronized systems, evolutionary concepts, basic understanding of performance as Gestalt patterns, theories of chill as performance goals or historical aspects are covered. The neurocognitive basis of motor action in terms of music, musical syntax, as well as therapeutic aspects are discussed. State-of-the-art applications in performance realizations, like virtual room acoustics, virtual musicians, new concepts of real-time physical modeling using complex performance data as input or sensor and gesture studies with soft- and hardware solutions are presented. So although the field is still much larger, this volume presents current trends in terms of understanding, implementing, and perceiving performance.

World Cinema and the Ethics of Realism Lúcia Nagib 2011-01-20 *World Cinema and the Ethics of Realism* is a

highly original study. Traditional views of cinematic realism usually draw on the so-called classical cinema and its allegiance to narrative mimesis, but Nagib challenges this, drawing instead on the filmmaker's commitment to truth and to the film medium's material bond with the real. Starting from the premise that world cinema's creative peaks are governed by an ethics of realism, Nagib conducts comparative case studies picked from world new waves, such as the Japanese New Wave, the French nouvelle vague, the Cinema Novo, the New German Cinema, the Russo-Cuban Revolutionary Cinema, the Portuguese self-performing auteur and the Inuit Indigenous Cinema. Drawing upon Badiou and Rancière, *World Cinema and the Ethics of Realism* revisits and reformulates several fundamental concepts in film studies, such as illusionism, identification, apparatus, alienation effects, presentation and representation. Its groundbreaking scholarship takes film theory in a bold new direction.

Assistive Technology Assessment Handbook Stefano Federici 2017-11-23 *Assistive Technology Assessment Handbook, Second Edition*, proposes an international ideal model for the assistive technology assessment process, outlining how this model can be applied in practice to re-conceptualize the phases of an assistive technology delivery system according to the biopsychosocial model of disability. The model provides reference guidelines for evidence-based practice, guiding both public and private centers that wish to compare, evaluate, and improve their ability to match a person with the correct technology model. This second edition also offers a contribution to the Global Cooperation on Assistive Technology (GATE) initiative, whose activities are strongly focused on the assistive products service delivery model. Organized into three parts, the handbook: gives readers a toolkit for performing assessments; describes the roles of the assessment team members, among them the new profession of psychotechnologist; and reviews technologies for rehabilitation and independent living, including brain-computer interfaces, exoskeletons, and technologies for music therapy. Edited by Stefano Federici and Marcia J. Scherer, this cross-cultural handbook includes contributions from leading experts across five continents, offering a framework for future practice and research.

Raising the Devil Bill Ellis 2021-05-11 *Raising the Devil* reveals how the Christian Pentecostal movement, right-wing conspiracy theories, and an opportunistic media turned grassroots folk traditions into the Satanism scare of the 1980s. During the mid-twentieth century, devil worship was seen as merely an isolated practice of medieval times. But by the early 1980s, many influential experts in clinical medicine and in law enforcement were proclaiming that satanic cults were widespread and dangerous. By examining the broader context for alleged "cult" activity, Bill Ellis demonstrates how the image of contemporary Satanism emerged during the 1970s. Blaming a wide range of mental and physical illnesses on in-dwelling demons, a faction of the Pentecostal movement became convinced that their gifts of the spirit were being opposed by satanic activities. They attributed these activities to a "cult" that was the evil twin of true Christianity. In some of the cases Ellis considers, common folk beliefs and rituals were misunderstood as evidence of devil worship. In others, narratives and rituals themselves were used to combat satanic forces. As the media found such stories more and more attractive, any activity with even remotely occult overtones was demonized in order to fit a model of absolute good confronting evil. Ellis's wide-ranging investigation covers ouija boards, cattle mutilation, graveyard desecration, and "diabolical medicine"—the psychiatric community's version of exorcism. He offers a balanced view of contentious issues such as demonic possession, satanic ritual abuse, and the testimonies of confessing "ex-Satanists." A trained folklorist, Ellis seeks to navigate a middle road in this dialog, and his insights into informal religious traditions clarify how the image of Satanism both explained and created deviant behavior.

Analyzing Elections Rebecca B. Morton 2006 It begins by examining the roles of the basic actors in elections—voters, candidates, parties and interest groups—and the institutional process through which the actors move. The analytical techniques presented in the first part of the book are then applied to questions about the effects of money and the mass media on electoral outcomes, the extent to which elections can control errant officials, and the problems of measuring public opinion and preferences. Special attention is devoted to the unique issues involved in the congressional redistricting as well as presidential primaries and the Electoral College. The analysis is extended to consider the roles played by minor party and independent candidates and the problems minorities face in achieving representation in the American electoral process.

Movies on Our Minds James E. Cutting 2021-08-10 This book traces the development of popular cinema from its inception to the present day to understand why humankind has expanded its viewing of popular movies over the last century. Drawing from his extensive work as a psychologist studying artistic canons, James E. Cutting presents hundreds of films across a wide range of genres and eras, considers the structure of frame content, shots, scenes, and larger narrational elements defined by color, brightness, motion, clutter, and range of other variables. He examines the effects of camera lenses, image layout, transitions, and historical functions to classify different kinds of shots. He explains the arcs of scenes, the larger structure of sequences, and the scene- and sequence-like units that have become increasingly prevalent in recent years. The book then breaks movies into larger, roughly half-hour parts and espouses the psychological evidence behind each device's intended effect, ultimately exploring the rhythms of whole movies, the flow of physical changes, and the cinematic polyrhythms that have come to match aspects those in the human body. Along the way, the book considers cultural and technological evolutions that have contributed to shifts in viewers' engagement by sustaining attention, promoting understanding of the narrative, heightening emotional commitment, and fostering felt presence in the story. *Movies on Our Minds* asks critical questions about how our emotional processes and the way our experiences of movies have changed over the course of cinematic history, for a cutting-edge look at what makes popular movies enjoyable.

The Chief Learning Officer Tamar Elkeles 2007 NEW - TAMAR ELKELES WINS PRESTIGIOUS AWARD! Tamar Elkeles, vice president of Qualcomm Learning Center and co-author of *The Chief Learning Officer*, has been named 2010 CLO of the Year by Chief Learning Officer magazine "Since she began with the company in 1992, Tamar Elkeles has built the Qualcomm Learning Center from a one-person operation into a sophisticated, integrated and innovative strategic resource for the organization" said Norm Kamikow, president and editor in chief of Chief Learning Officer magazine. Congratulations Tamar! ----- New business realities and customer demands, coupled with new technologies in a changing competitive landscape are causing corporate learning departments to rethink their value, role, and impact in the organization. In a constantly changing business landscape with limited resources and tight budgets, learning must be viewed as essential to a successful achievement of business goals. The individual driving this function, the Chief Learning Officer (CLO), is in a unique position to add significant value to the organization. The role of the CLO is to drive value, focusing on issues such as business alignment, managing resources, innovation, customer service and ROI. The challenge is to show value to the organization in terms that business leaders and financial analysts can understand and appreciate. Written from the perspective of the CLO, this book discusses nine important value-adding strategies, making up this critical role of the CLO of the future. At least twenty high profile CLOs provide their strategies on each of these issues. This book is essential reading for both the training and HR communities who need to show the value and connect learning to the business. This book shows the value that can be achieved in the organization if it is managed and organized properly and the appropriate leadership is provided. * Real world strategies from successful CLO's * Practical applications for skill development * Shows how to connect the learning enterprise to the business.
