Modern Music and After Paul Griffiths 2011-02-16 Over three decades, Paul Griffiths's survey has remained the definitive study of music since the Second World War; this fully revised and updated edition re-establishes *Modern Music and After* as the preeminent introduction to the music of our time. The disruptions of the war, and the struggles of the ensuing peace, were reflected in the music of the time: in Pierre Boulez's radical reformation of compositional technique and in John Cage's development of zen music; in Milton Babbitt's settling of the serial system and in Dmitry Shostakovich's unsettling symphonies; in Karlheinz Stockhausen's development of electronic music and in Luigi Nono's pursuit of the universally human, in Iannis Xenakis's view of music as sounding mathematics and in Luciano Berio's consideration of it as language. The initiatives of these composers and their contemporaries opened prospects that haven't yet stopped unfolding. This constant expansion of musical thinking since 1945 has left us with no singular history of music; Griffiths's study accordingly follows several different paths, showing how and why they converge and diverge. This new edition of *Modern Music and After* discusses not only the music of the fifteen years that have passed since the previous edition, but also the recent explosion of scholarly interest in the latter half of the twentieth century. In

particular, the book has been expanded to incorporate the variety of responses to the modernist impasse experienced by composers of the 1980s and 1990s. Griffiths then moves the book into the twenty-first century as he examines such highly influential composers as Helmut Lachenmann and Salvatore Sciarrino. For its breadth, wealth of detail, and characteristic wit and clarity, the third edition of *Modern Music and After* is required reading for the student and the enquiring listener.

A Mathematician's Apology G. H. Hardy 1992-01-31 G. H. Hardy was one of this century's finest mathematical thinkers, renowned among his contemporaries as a 'real mathematician ... the purest of the pure'. He was also, as C. P. Snow recounts in his Foreword, 'unorthodox, eccentric, radical, ready to talk about anything'. This 'apology', written in 1940 as his mathematical powers were declining, offers a brilliant and engaging account of mathematics as very much more than a science; when it was first published, Graham Greene hailed it alongside Henry James's notebooks as 'the best account of what it was like to be a creative artist'. C. P. Snow's Foreword gives sympathetic and witty insights into Hardy's life, with its rich store of anecdotes concerning his collaboration with the brilliant Indian mathematician Ramanujan, his aphorisms and idiosyncrasies, and his passion for cricket. This is a unique account of the fascination of mathematics and of one of its most compelling exponents in modern times.

Columbia Pictures Bernard F. Dick 2021-10-19 Drawing on previously untapped archival materials including letters, interviews, and more, Bernard F. Dick traces the history of Columbia Pictures, from its beginnings as the CBC Film Sales Company, through the regimes of Harry Cohn and his successors, and ending with a vivid portrait of today's corporate Hollywood. The book offers unique perspectives on the careers of Rita Hayworth and Judy Holliday, a discussion of Columbia's unique brands of screwball comedy and film noir, and analyses of such classics as *The Awful Truth*, *Born Yesterday*, and *From Here to Eternity*. Following the author's highly readable studio chronicle are fourteen original essays by

leading film scholars that follow Columbia's emergence from Poverty Row status to world class, and the stars, films, genres, writers, producers, and directors responsible for its transformation. A new essay on Quentin Tarantino's *Once Upon a Time...in Hollywood* rounds out the collection and brings this seminal studio history into the 21st century. Amply illustrated with film stills and photos of stars and studio heads, *Columbia Pictures* is the first book to integrate history with criticism of a single studio, and is ideal for film lovers and scholars alike.

The Selling of 9/11 D. Heller 2016-09-23 *The Selling of 9/11* argues that the marketing and commodification of the terrorist attacks of September 11, 2001, reveal the contradictory processes by which consumers in the United States (and around the world) use, communicate, and construct national identity and their sense of national belonging through cultural and symbolic goods. Contributors illuminate these processes and make important connections between myths of nation, practices of mourning, theories of trauma, and the politics of post-9/11 consumer culture. Their essays take critical stock of the role that consumer goods, media and press outlets, commercial advertising, marketers and corporate public relations have played in shaping cultural memory of a national tragedy.

[Critical Analysis of Science Textbooks](#) Myint Swe Khine 2013-06-26 The critical analysis of science textbooks is vital in improving teaching and learning at all levels in the subject, and this volume sets out a range of academic perspectives on how that analysis should be done. Each chapter focuses on an aspect of science textbook appraisal, with coverage of everything from theoretical and philosophical underpinnings, methodological issues, and conceptual frameworks for critical analysis, to practical techniques for evaluation. Contributions from many of the most distinguished scholars in the field give this collection its sure-footed contemporary relevance, reflecting the international standards of UNESCO as well as leading research organizations such as the American Association for the Advancement of Science (whose Project 2061 is an influential waypoint in developing protocols for textbook analysis). Thus

the book shows how to gauge aspects of textbooks such as their treatment of controversial issues, graphical depictions, scientific historiography, vocabulary usage, accuracy, and readability. The content also covers broader social themes such as the portrayal of women and minorities. "Despite newer, more active pedagogies, textbooks continue to have a strong presence in classrooms and to embody students' socio-historical inheritance in science. Despite their ubiquitous presence, they have received relatively little on-going empirical study. It is imperative that we understand how textbooks influence science learning. This book presents a welcome and much needed analysis." Tina A. Grotzer Harvard University, Cambridge, Massachusetts, USA The present book provides a much needed survey of the current state of research into science textbooks, and offers a wide range of perspectives to inform the 'science' of writing better science textbooks. With a Critical Eye Arthur J. Vidich 2009 Internationally renowned sociologist Arthur J. Vidich (1922-2006) was an active researcher and teacher whose career spanned the second half of the twentieth century. *With a Critical Eye: An Intellectual and His Times* recounts Vidich's career in the wider cultural context of his life and work. Providing a window into post-World War II intellectual life, the richness of the autobiography lies not only in Vidich's perspectives on the academic world but also in his personal and sociological observations about the world around him. Best known for his book *Small Town in Mass Society* (co-authored with Joseph Berman, 1958), Vidich taught for more than forty years at the New School for Social Research in New York. He published eighteen books, co-edited a book series with Robert Jackall, and was the founding editor of the *International Journal of Politics, Culture, and Society*. Vidich "provides a valuable lens ... on a profoundly important time in the formation of the modern social sciences, when the changes in the U.S. were having formative impacts on academe in other parts of the world," writes Robert J. Antonio, professor of sociology at the University of Kansas. "The autobiography is lucidly and unpretentiously written." Book jacket.

The Modern Satiric Grotesque and Its Traditions John R. Clark

2014-07-15 Thomas Mann predicted that no manner or mode in literature would be so typical or so pervasive in the twentieth century as the grotesque. Assuredly he was correct. The subjects and methods of our comic literature (and much of our other literature) are regularly disturbing and often repulsive -- no laughing matter. In this ambitious study, John R. Clark seeks to elucidate the major tactics and topics deployed in modern literary dark humor. In Part I he explores the satiric strategies of authors of the grotesque, strategies that undercut conventional usage and form: the de-basement of heroes, the denigration of language and style, the disruption of normative narrative technique, and even the debunking of authors themselves. Part II surveys major recurrent themes of grotesquerie: tedium, scatology, cannibalism, dystopia, and Armageddon or the end of the world. Clearly the literature of the grotesque is obtrusive and ugly, its effect morbid and disquieting -- and deliberately meant to be so. Grotesque literature may be unpleasant, but it is patently insightful. Indeed, as Clark shows, all of the strategies and topics employed by this literature stem from age-old and spirited traditions. Critics have complained about this grim satiric literature, asserting that it is dank, cheerless, unsavory, and negative. But such an interpretation is far too simplistic. On the contrary, as Clark demonstrates, such grotesque writing, in its power and its prevalence in the past and present, is in fact conventional, controlled, imaginative, and vigorous -- no mean achievements for any body of art.

Reading Song Lyrics Lars Eckstein 2010-01-01 Reading Song Lyrics offers the first systematic introduction to lyrics as a vibrant genre of (performed) literature. It takes lyrics seriously as a complex form of verbal art that has been unjustly neglected in literary, music, and, to a lesser degree, cultural studies, partly as it cuts squarely across institutional boundaries. The first part of this book accordingly introduces a thoroughly

transdisciplinary interpretive framework. It outlines theoretical approaches to issues such as performance and performativity, generic convention and cultural capital, sound and songfulness, mediality and musical multimedia, and step by step applies them to the example of a single song. The second part then offers three extended case studies which showcase the larger cultural and historical viability of this model. Probing into the relationship between lyrics and the ambivalent performance of national culture in Britain, it offers exemplary readings of a highly subversive 1597 ayre by John Dowland, of an 1811 broadside ballad about Sara Baartman, 'The Hottentot Venus', and of a 2000 song by 'jungle punk' collective Asian Dub Foundation. Reading Song Lyrics demonstrates how and why song lyrics matter as a paradigmatic art form in the culture of modernity.

The Street Was Mine M. Abbott 2002-12-19 This book considers a recurrent figure in American literature: the solitary white man moving through urban space. The descendent of Nineteenth-century frontier and western heroes, the figure re-emerges in 1930-50s America as the 'tough guy'. *The Street Was Mine* looks to the tough guy in the works of hardboiled novelists Raymond Chandler (*The Big Sleep*) and James M. Cain (*Double Indemnity*) and their popular film noir adaptations. Focusing on the way he negotiates racial and gender 'otherness', this study argues that the tough guy embodies the promise of an impervious white masculinity amidst the turmoil of the Depression through the beginnings of the Cold War, closing with an analysis of Chester Himes, whose Harlem crime novels (*For Love of Imabelle*) unleash a ferocious revisionary critique of the tough guy tradition.

The last essay *The Practice of Meditation* is written and illustrated in his own hand.

Genetic Diversity in Plants Amir Muhammed 2012-12-06 For the last eighteen years we have been deeply involved in a cooperative effort with our Latin American colleagues in genetics, biochemistry, physiology, and molecular biology. We have been in close contact with scientists in a number of centers and have helped to organize symposia, workshops, and so forth, in an effort to accelerate their development and make their substantial work known. These symposia in Latin America have been quite successful. The fifteenth will take place in Brasilia in 1977. At the request of colleagues, we are in the process of developing a similar series in Asia. The first very successful symposium was held in Calcutta in 1973. We were most pleased when Dr. Amir Muhammed, Vice Chancellor of the University of Agriculture, Lyallpur suggested that we hold a symposium on a topic of great importance to Pakistan, Genetic Control of Diversity in Plants, under the auspices of the University of Agriculture. It is our hope that this symposium will be followed by additional ones in Pakistan as well as in other countries in the Far East. Leadership is quickly developing in the hands of outstanding scientists in these countries, and we appreciate the opportunity to cooperate with them. We are especially grateful to the National Science Foundation for making PL- 480 funds available which made this symposium possible.

The Comparative Reception of Relativity T.F Glick 2012-12-06 The present volume grew out of a double session of the Boston Colloquium for the Philosophy of Science held in Boston on March 25, 1983. The papers presented there (by Biezunski, Glick, Goldberg, and Judith Goodstein!) offered both sufficient comparability to establish regularities in the reception of relativity and Einstein's impact in France, Spain, the United States and Italy, and sufficient contrast to suggest the salience of

national inflections in the process. The interaction among the participants and the added perspectives offered by members of the audience suggested the interest of commissioning articles for a more inclusive volume which would cover as many national cases as we could muster. Only general guidelines were given to the authors: to treat the special or general theories, or both, hopefully in a multidisciplinary setting, to examine the popular reception of relativity, or Einstein's personal impact, or to survey all these topics. In a previous volume, on the comparative reception of Darwinism, one of us devised a detailed set of guidelines which in general were not followed. In our opinion, the studies in this collection offer greater comparability, no doubt because relativity by its nature and its complexity offers a sharper, more easily bounded target. As in the Darwinism volume, this book concludes with an essay intended to draw together in comparative perspective some of many themes addressed by the participants.

Scientific Basis for Ayurvedic Therapies Lakshmi C. Mishra 2003-09-29 Arguably the oldest form of health care, Ayurveda is often referred to as the "Mother of All Healing." Although there has been considerable scientific research done in this area during the last 50 years, the results of that research have not been adequately disseminated. Meeting the need for an authoritative, evidence-based reference, *Scientific Basis for Ayurvedic Therapies* is a comprehensive, evidence-based reference. *Revival of Religion's Sciences (Ihya Ulum ad-din) 1-4 Vol 1* Abi Hamed al Ghazali 2010-01-01

Empire of Illusion Chris Hedges 2009-07-28 Pulitzer prize-winner Chris Hedges charts the dramatic and disturbing rise of a post-literate society that craves fantasy, ecstasy and illusion. Chris Hedges argues that we now live in two societies: One, the minority, functions in a print-based, literate world, that can cope with complexity and can separate illusion from truth. The other, a growing majority, is retreating from a reality-based world into one of false certainty and magic. In this "other society," serious film and theatre, as well as newspapers and books, are being pushed to the margins. In the tradition of Christopher Lasch's *The Culture of Narcissism* and Neil Postman's *Amusing Ourselves to Death*, Hedges navigates this culture — attending WWF contests as well as Ivy League

graduation ceremonies — exposing an age of terrifying decline and heightened self-delusion.

Speculative Blackness André M. Carrington 2016-02-29 In *Speculative Blackness*, André M. Carrington analyzes the highly racialized genre of speculative fiction—including science fiction, fantasy, and utopian works, along with their fan cultures—to illustrate the relationship between genre conventions in media and the meanings ascribed to blackness in the popular imagination. Carrington’s argument about authorship, fandom, and race in a genre that has been both marginalized and celebrated offers a black perspective on iconic works of science fiction. He examines the career of actor Nichelle Nichols, who portrayed the character Uhura in the original *Star Trek* television series and later became a recruiter for NASA, and the spin-off series *Star Trek: Deep Space Nine*, set on a space station commanded by a black captain. He recovers a pivotal but overlooked moment in 1950s science fiction fandom in which readers and writers of fanzines confronted issues of race by dealing with a fictitious black fan writer and questioning the relevance of race to his ostensible contributions to the 'zines. Carrington mines the productions of Marvel comics and the black-owned comics publisher Milestone Media, particularly the representations of black sexuality in its flagship title, *Icon*. He also interrogates online fan fiction about black British women in *Buffy the Vampire Slayer* and the *Harry Potter* series. Throughout this nuanced analysis, Carrington theorizes the relationship between race and genre in cultural production, revealing new understandings of the significance of blackness in twentieth-century American literature and culture.

Musical Biographies Michal Ben-Horin 2016-04-25 Since the second half of the twentieth century various routes, including history and literature, are offered in dealing with the catastrophe of World War II and the Holocaust. Historiographies and novels are of course written with words; how can they bear witness to and reverberate with traumatic experience that escapes or resists language? In search for an alternative mode of expression and representation, this volume focuses on postwar German and Austrian writers who made use of music in their exploration of the National Socialist past. Their works invoke, however, new questions: What

happens when we cross the line between narration and documentation, and between memory and a musical piece? How does identification and fascination affect our reading of the text? What kind of ethical issues do these testimonies raise? As this volume shows, reading these musical biographies is both troubling and compelling since they ‘fail’ to come to terms with the past. In playing the haunting music that does not let us put the matter to rest, they call into question not only the exclusion of personal stories by official narratives, but also challenge writers’ and readers’ most intimate perspectives on an unmasterable past.

Setting God Free Seán Ólaoire 2021-07-07 A priest, a scientist, and a psychologist walk into a bar... This isn't the beginning of a joke. It's the start of a long-overdue conversation about how mainstream religion has handed down a God that only a sadomasochist could love. How are we supposed to worship a deity who wantonly slaughters innocents to assuage His own bloodthirsty rage? Thank the loving God revealed in the pages of *Setting God Free* that Seán Ólaoire has finally unpacked the horror show known as "the difficult passages" of the Bible, giving readers access to a cosmology built not on canonical scripture alone, but also on science, spirituality, and personal experience. And as for the God we humans have created in our own image? His day in court has finally come.

Linking Literature with Life Alexa L. Sandmann 2002 Three significant changes have impacted the teaching of social studies to young adolescents in the past decade: (1) development of the curriculum standards for social studies by the National Council for the Social Studies (NCSS); (2) growth in the number of middle schools, which are premised on the integration of content; and (3) expansive use of children's literature in social studies. This book is in response to those innovations which are explained in two parts: (1) provides a rationale for using trade

books in social studies and details strategies for nurturing students' reading comprehension; and (2) provides annotations for more than 250 trade books, along with ideas for classroom use, and recommends 150+ additional titles. An index by title and an index by subject are also included. (BT)

Italian Mathematics Between the Two World Wars Angelo Guerraggio 2006-01-20 This book describes Italian mathematics in the period between the two World Wars. It analyzes the development by focusing on both the interior and the external influences. Italian mathematics in that period was shaped by a colorful array of strong personalities who concentrated their efforts on a select number of fields and won international recognition and respect in an incredibly short time. Consequently, Italy was considered a third mathematical power after France and Germany.
