More Power From NHC 250 in M939 Series Trucks With Allison ...

The 270 that most of us know of is in general a 250 855 with a turbo and cam from the factory with the turbo. The super 250 was a 1/2" longer stroke but same bore as a 855. That shows what I know Glenn. I thought the super 250 was a non-turbo engine, and the 270 was a different model that was turbo'd.

250 Cummins(non-turbo) time frame - ATHS

All M-809 trucks, including the M-818, carried a six-cylinder Cummins NHC-250 engine that ran on diesel fuel. The strength of the engine was rated at 250 horsepower with the engine running at 2,100 rpm. The unique aspect of the engine that made it stand out from other five-ton trucks was the placement of the air intake.
