Semionauts of Tradition Juliette Yu-Ming Lizeray 2019-01-16

This book explores questions of identity, cultural change and creativity from the perspective of contemporary musicians currently engaged in redefining Asian musical traditions and notions of heritage in Singapore. Drawing on the fields of anthropology, cultural studies, and ethnomusicology, Semionauts

of Tradition focuses on emerging millennial musicians and explores the complex and interwoven cultural, national, musical, and personal identifications in their discourse and music practice. It shows how they create fluid, hybrid and counter-hegemonic forms of expression, representation and identity through their navigation of diverse cultural worlds, their incorporation of a

elements into their own identities and music, and their contestations of preconceived notions of difference and tradition. The book exposes paradoxes within current thinking about 'multiracialism', 'racial harmony', the 'East/West divide' and 'tradition versus modernity,' and proposes new ways of understanding identity, cultural change and creativity in a highly globalised, and diverse nation. This highly-original polyvocal account of a burgeoning music scene includes photos, musical scores and reaction pieces by musicians. It is a timely contribution to global discussions about 'multiculturalism from below,' as well as musical, cultural and national identities in a postcolonial Southeast Asian setting, from the viewpoint of artists engaged in creative meaning-making. "This captivating book explores - with tremendous intellectual vitality -

the dialectic relationships between the cultural, ethnic and national identities of Singapore's creative youth, and their creative practice. A compelling read!" Dr Liora Bresler, Professor, University of Illinois "A well-researched and thoughtfully well-written book about the diverse forms of music in Singapore and the musicians who created it." - Jeremy Monteiro, jazz pianist, singer, composer, and music educator "This wonderfully lucid and compelling book analyzes the musical and cultural creativity of young Singaporean musicians growing up in a multicultural and ethnically plural society, bringing Asian and Western musical cultures into creative dialogue." - Dr Deborah Pacini Hernandez, Professor Emeritus, Tufts University "A thought provoking dialogue on contemporary Singaporean music!" -Eric Watson, composer, conductor, music teacher and

Ethnobotany Gary J. Martin

2014-07-29 Ethnoecology has blossomed in recent years into an important science because of the realization that the vast body of knowledge contained in both indigenous and folk cultures is being rapidly lost as natural ecosystems and cultures are being destroyed by the encroachment of development. Ethnobotany and ethnozoology both began largely with direct observations about the ways in which people used plants and animals and consisted mainly of the

compilation of lists. Recently, these subjects have adopted a much more scientific and quantitative methodology and have studied the ways in which people manage their environment and, as a consequence, have used a much more ecological approach. This manual of ethnobotanical methodology will become an essential tool for all ethnobiologists and ethnoecologists. It fills a significant gap in the literature and I only wish it had been available some years previously so that I could have given it to many of my students. I shall certainly recommend it to any future students who are interested in ethnoecology. I particularly like the sympathetic approach to local peoples which pervades this book. It is one which encourages the ethnobotanical work by both the local people themselves and by academically trained

A study of this book will avoid many of the arrogant approaches of the past and encourage a fair deal for any group which is being studied. This manual promotes both the involvement of local people and the return to them of knowledge which has been studied by outsiders.

My Gaza 2020-10-06 My Gaza is a startling contemporary perspective on the photographer's homeland. Saftawi's eye is drawn to moments of humanity and tenderness that redefine this place, outside of propaganda, outside of all we know. The modern reality there leaves no room for further escalation, as these photographs testify. A gun to the head. An interrogation. A family in strife. In vivid images from Saftawi, My Gaza tells an authentic new story with dignity and resolve.

CRC World Dictionary of Medicinal and Poisonous Plants

Umberto Quattrocchi 2016-04-19
"Following on the successes of two previous dictionary projects, the CRC World Dictionary of Plant Names and the CRC World

Dictionary of the Grasses, Umberto Quattrocchi has undertaken this dictionary of economically important plants.... He has done for these plants what was so admirably done in his other works—brought the vast and scattered literature on plant names, and in this case, too, their uses, into coherent order so that the inquisitive scholar can get a foothold." —From the Foreword, Donald H. Pfister, Harvard University and Harvard University Herbaria, Cambridge, Massachusetts The CRC World Dictionary of Medicinal and Poisonous Plants: Common Names, Scientific Names, Eponyms, Synonyms, and Etymology provides the starting point for better access to data on plants used around the world in medicine, food, and cultural practices. Rwanda Cross Roads, The Last 150 Years, Let us Embrace the New Rwanda DR Michael M. Biryabarema 2021-10-03

The book discusses the times in the last 150 year history of Rwanda when certain internal and external dynamics came into play which brought the nation to the crossroads. It discusses these seasons and who were at the center of the events and the great lessons that can be learnt

from that history. The book also looks at some decisions taken by key people or institutions during those critical periods and their consequences then and the consequences that still linger. It asserts that looking at history with objectivity helps build a more progressive future and helps focus on what worked very well or that which was disastrous, to be avoided. The book looks at certain principles that are key for building a united and prosperous nation. The book further discusses the new hope since the time of the genocide against the Tutsi till today and how the nation has moved from total darkness to becoming a normal nation that is aspiring for a very bright future. The role of the RPF's core political values of democracy, dialogue and consensus building are briefly discussed as the keys that made possible this new optimistic dynamism, a philosophy helping the Rwandan people

The Wish (A Roald Dahl Short Story) Roald Dahl 2012-09-13 The Wish is a short, sharp, chilling story from Roald Dahl, the master of the shocking tale In The Wish, Roald Dahl, one of the world's favourite authors, tells a sinister story about the darker side of human nature. Here, an imaginative boy plays a game that quickly gets out of hand . . . The Wish is taken from the short story collection Someone Like You, which includes seventeen other devious and shocking stories, featuring the wife who serves a dish that baffles the police; a curious machine that

reveals the horrifying truth about plants; the man waiting to be bitten by the venomous snake asleep on his stomach; and others. 'The absolute master of the twist in the tale.' (Observer) This story is also available as a Penguin digital audio download read by the sublime Stephen Mangan. Roald Dahl, the brilliant and worldwide acclaimed author of Charlie and the Chocolate Factory, James and the Giant Peach, Matilda, and many more classics for children, also wrote scores of short stories for adults. Medical Anthropology Andrea S.

Wiley 2009 Intended as the

primary text for introductory courses on medical anthropology, this book integrates human

biological data relevant to health and disease with both

evolutionary theory and the social environments that more often than not produce major challenges to health and survival.

Because students who take this fastest-growing anthropology course come from a variety of

disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and

then expand their analysis to include evolutionary, historical, and cross-cultural perspectives.

Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.

Musical Worlds in Yogyakarta
Max Richter 2012-01-01 Musical Worlds in Yogyakarta addresses themes of social identity and

power, counterpoising Pierre Bourdieu's theories on class, gender and nation with the author's alternative perspectives of inter-group social capital, physicality and grounded cosmopolitanism. The author argues that Yogyakarta is exemplary of how everyday people make use of music to negotiate issues of power and at the same time promote peace and intergroup appreciation in culturally diverse inner-city settings.
