Keys to Play Roger Moseley 2016-10-28 A free ebook version of this title is available through Luminos, University of California Press's Open Access publishing program for monographs. Visit www.luminosoa.org to learn more. How do keyboards make music playable? Drawing on theories of media, systems, and cultural techniques, *Keys to Play* spans Greek myth and contemporary Japanese digital games to chart a genealogy of musical play and its animation via improvisation, performance, and recreation. As a paradigmatic digital interface, the keyboard forms a field of play on which the book's diverse objects of inquiry—from clavichords to PCs and eighteenth-century musical dice games to the latest rhythm-action titles—enter

into analogical relations. Remapping the keyboard's topography by way of Mozart and Super Mario, who head an expansive cast of historical and virtual actors, *Keys to Play* invites readers to unlock ludic dimensions of music that are at once old and new.

Frank Stella Frank Stella 2011 The art of Frank Stella (born 1936) transcends the boundaries between painting, sculpture and architecture. Over the course of a five-decade career the artist has consistently reinvented himself, to such an extent that today we are faced with seven or eight Stellas, ranging from austere minimalist to baroque maximalist. *Frank Stella: Connections* carefully orchestrates a selection of paintings and sculptures to reveal a surprisingly unified Stella. Included are previously unseen early Minimalist works and "turning points" from the artist's personal

as well as selections from such major series as the Irregular Polygons and Protractor paintings of the 1960s, the Polish Village and Circuit series of the 1970s and 1980s, and the metal reliefs and monumental floor sculptures of the last two decades. Through a series of encounters, juxtapositions and dialogues, the underlying concerns and extraordinary consistency of Stella's practice are here brought to light.

Improvisation and Social Aesthetics Georgina Born
2017-03-03 Addressing a wide range of improvised art and music forms—from jazz and cinema to dance and literature—this volume's contributors locate improvisation as a key site of mediation between the social and the aesthetic. As a catalyst for social experiment and political practice, improvisation aids in the creation, contestation, and codification of social realities and identities. Among other topics, the

contributors discuss the social aesthetics of the Association for the Advancement of Creative Musicians, the Feminist Improvising Group, and contemporary Malian music, as well as the virtual sociality of interactive computer music, the significance of "uncreative" improvisation, responses to French New Wave cinema, and the work of figures ranging from bell hooks and Billy Strayhorn to Kenneth Goldsmith. Across its diverse chapters, *Improvisation and Social Aesthetics* argues that ensemble improvisation is not inherently egalitarian or emancipatory, but offers a potential site for the cultivation of new forms of social relations. It sets out a new conceptualization of the aesthetic as immanently social and political, proposing a new paradigm of improvisation studies that will have reverberations throughout the humanities. Crime Films Thomas Leitch 2002-08-15 This book surveys the entire range of crime films, including important subgenres such as the gangster film, the private eye film, film noir, as well as the victim film, the erotic thriller, and the crime comedy. Focusing on ten films that span the range of the twentieth century, Thomas Leitch traces the transformation of the three leading figures that are common to all crime films: the criminal, the victim and the avenger. Analyzing how each of the subgenres establishes oppositions among its ritual antagonists, he shows how the distinctions among them become blurred throughout the course of the century. This blurring, Leitch

maintains, reflects and fosters a deep social ambivalence towards crime and criminals, while the criminal, victim and avenger characters effectively map the shifting relations between subgenres, such as the erotic thriller and the police film, within the larger genre of crime film that informs them all.

Armenian Jasmine Dum-Tragut 2009-12-17 This grammar of Modern Eastern Armenian gives a precise and explicit description of the Eastern Armenian language of the Republic of

Armenia. It covers not only the normative tradition but, more importantly, also describes the colloquial language as it is used in Armenia today. With regard to methodological approach and terminology it fully meets the demands of modern general linguistics and typology. This grammar will be of interest not only to the specialised readership of descriptive and comparative linguists, of typologists and of armenologists, but to all those who would like to acquaint themselves with linguistic data from living Armenian. It will also be of use to students wishing to learn Modern Eastern Armenian and to lecturers in Modern Eastern Armenian language courses.

Columbia Pictures Bernard F. Dick 2021-10-19 Drawing on previously untapped archival materials including letters, interviews, and more, Bernard F. Dick traces the history of Columbia Pictures, from its beginnings as the CBC Film Sales Company, through the regimes of Harry Cohn and

his successors, and ending with a vivid portrait of today's corporate Hollywood. The book offers unique perspectives on the careers of Rita Hayworth and Judy Holliday, a discussion of Columbia's unique brands of screwball comedy and film noir, and analyses of such classics as *The Awful Truth*, *Born Yesterday*, and *From Here to Eternity*. Following the author's highly readable studio chronicle are fourteen original essays by leading film scholars that follow Columbia's emergence from Poverty Row status to world class, and the stars, films, genres, writers, producers, and directors responsible for its transformation. A new essay on Quentin Tarantino's *Once Upon a Time...in Hollywood* rounds out the collection and brings this seminal studio history into the 21st century. International Perspectives on Spinal Cord Injury World Health Organization 2013
"Every year between 250 000 and 500 000 people suffer a spinal cord injury, with road traffic crashes, falls and violence as the three leading causes. People with spinal cord injury are two to five times more likely to die prematurely. They also have lower rates of school enrollment and economic participation than people without such injuries. Spinal cord injury has costly consequences for the individual and society, but it is preventable, survivable and need not preclude good health and social inclusion. Ensuring an adequate medical and rehabilitation response, followed by supportive services and accessible environments, can help minimize the disruption to people with spinal cord injury and their

families. The aims of International perspectives on spinal cord injury are to: -
-assemble and summarize information on spinal cord injury, in particular the epidemiology, services, interventions and policies that are relevant, together with the lived experience of people with spinal cord injury; --make recommendations for actions based on this evidence that are consistent with the aspirations for people with disabilities as expressed in the Convention on the Rights of Persons with Disabilities.

This combination of classic and contemporary work from the last 30 years presents the reader with cutting-edge perspectives on child language by linking historical approaches with current ideas such as exemplar theory and usage-based phonology and contrasting state-of-the-art perspectives from developmental psychology and linguistics. in Action: European Perspectives is one of the important outcomes of the COST Action CA16121, From Sharing to Caring: Examining the Socio-Technical Aspects of the Collaborative Economy (short name: Sharing and Caring; sharingandcaring.eu) that was active between March 2017 and September 2021. The Action was funded by the European Cooperation in Science and Technology - COST (www.cost.eu/actions/CA16121). The main objective of the COST Action Sharing and Caring is the development of a European network of researchers and practitioners interested in investigating the collaborative economy models, platforms, and their socio-technological implications. The network involves scholars, practitioners, communities, and policymakers. The COST Action Sharing and Caring helped to connect research

initiatives across Europe and enabled scientists to develop their ideas by collaborating with peers. This collaboration opportunity represented a boost for the participants' research, careers, and innovation potential. The main aim of this book is to provide a comprehensive overview of the collaborative economy (CE) in European countries with a variety of its aspects for a deeper understanding of the phenomenon as a whole. For this reason, in July 2017, an open call for country reports was distributed among the members of the COST Action Sharing and Caring. Representatives of the member countries were invited to produce short country reports covering: definition(s) of the CE; types and models of the CE; key stakeholders involved; as well as legislation and technological tools relevant for the CE. Submitted reports varied in length and regarding the level of the team

included, in accordance with how much information was available in each respective country at the time of writing. Editors of the book have compiled these early reports into a summary report, which was intended as a first step in mapping the state of the CE in Europe. The Member Countries Report on the Collaborative Economy, edited by Gaia Mosconi, Agnieszka Lukasiewicz, and Gabriela Avram (2018) that was published on the Sharing and Caring website, represented its first synergetic outcome and provided an overview of the CE phenomenon as interpreted and manifested in each of the countries part of the network. Additionally, Sergio Nassare-Aznar, Kosjenka Dumančić, and Giulia Priora compiled a Preliminary Legal Analysis of Country Reports on Cases of Collaborative Economy (2018). In 2018, after undertaking an analysis of the previous reports'

strengths and weaknesses, the book editors issued a call for an updated version of these country reports. Prof. Ann Light advised the editorial team, proposing a new format for country reports and 4000 words limit. The template included: Introduction, Definition, Key Questions, Examples, Illustration, Context, Developments, Issues, Other Major Players, and Relevant Literature. The new template was approved by the Management Committee in October 2018. The task force that had supported the production of the first series of country reports (Dimitar Trajanov, Maria del Mar Alonso, Bálint Balázs, Kosjenka Dumančić, and Gabriela Avram) acted as mentors for the team of authors in each country. The final reports arrived at the end of 2018, bringing the total number of submissions to 30 (twenty-nine European countries plus Georgia). A call for book editors was issued, and a new editorial team

team was formed by volunteers from the participants of the COST Action: Andrzej Klimczuk, Vida Česnuityte, Cristina Miguel, Santa Mijalche, Gabriela Avram, Bori Simonovits, Bálint Balázs, Kostas Stefanidis, and Rafael Laurenti. The editorial team organized the double-blind reviews of reports and communicated to the authors the requirements for improving their texts. After reviews, the authors submitted updated versions of their country reports providing up-to-date interdisciplinary analysis on the state of the CE in 2019, when the reports were collected. During the final phase, the chapters were again reviewed by the lead editors together with all editorial team members. At the time, the intention was to update these reports again just before the end of the COST Action Sharing and Caring in 2021 and to produce a third edition. However, the COVID-19

pandemic changed these plans. Thus, this final volume was created by 82 scholars-editors and contributors-and consists of reports on 27 countries participating in the COST Action.

German Pop Music Uwe Schütte 2017-01-11 The development of German pop music represents a fascinating cultural mirror to the history of post-war Germany, reflecting sociological changes and political developments. While film studies is an already established discipline, German pop music is currently emerging as a new and exciting field of academic study. This pioneering companion is the first volume to provide a comprehensive overview of the subject, charting the development of German pop music from the post-war period 'Schlager' to the present 'Diskursrock'.

chapters provide overviews of pertinent genres as well as focusing on major bands such as CAN, Kraftwerk or Rammstein. While these acts have shaped the international profile of German pop music, the volume also undertakes in-depth examinations of the specific German contributions to genres such as punk, industrial, rap and techno. The survey is concluded by an interview with the leading German pop theorist Diederich Diederichsen. The volume constitutes an indispensable companion for any student, teacher and scholar in the area of German studies interested in contemporary popular culture.

Indeed, the immense, painstaking, indefatigable and ever-improving effort of Husserl to find ever-deeper and more reliable foundations for the philosophical enterprise (as well as his constant critical re-thinking and perfecting of the approach and so called "method" in order to perform this task and thus cover in this source-excavation an ever more far-reaching groundwork) stands out and maintains itself as an inexhaustible reservoir for philosophical reflection in which all the above-mentioned work has either its core or its source. In fact, in his undertaking to re-think the entire philosophical enterprise as such and to recreate philosophy upon what he sought to be at least a satisfactorily legitimated basis, Husserl, through his already systematised and "authorized" work, and his courses, and later on in his spontaneous reflection (which did not find its way

into a definitive corpus but was nevertheless sufficiently coherent with his previously established body of thought to be considered a continuation of it), uncovers perspectives upon the universe of man and projects their new philosophical thematisation that brings together all the attempts by philosophers (e. g. , Merleau-Ponty, who drew upon this material and found there his own inspiration) who succeeded him with foundational intentions; it also gives a core of philosophical ideas and insights for the younger generation of philosophers today.

MUSICAGE John Cage
2011-03-01 "I was obliged to find a radical way to work -- to get at the real, at the root of the matter," John Cage says in this trio of dialogues, completed just days before his death. His quest for the root of the matter led him beyond the bounds of the conventional in all his musical, written, and visual pieces. The resulting expansion of the definition of art -- with its concomitant emphasis on innovation and invention--earned him a reputation as one of America's most influential contemporary artists. Joan Retallack's conversations with Cage represent the first

consideration of his artistic production in its entirety, across genres. Informed by the perspective of age, Cage's comments range freely from his theories of chance and indeterminate composition to his long-time collaboration with Merce Cunningham to the aesthetics of his multimedia works. A composer for whom the whole world -- with its brimming silences and anarchic harmonies -- was a source of music, Cage once claimed, "There is no noise, only sounds." As these interviews attest, that penchant for testing traditions reached far beyond his music. His lifelong project, Retallack writes in her comprehensive introduction, was "dislodging cultural authoritarianism and gridlock by inviting surprising conjunctions within carefully delimited frameworks and processes." Consummate performer to the end, Cage delivers here just such a conjunctioned-fem

Saturday Night Live, Hollywood Comedy, and American Culture sheds new light on the ways in which Saturday Night Live's confrontational, boundary-pushing approach spilled over into film production, contributing to some of the biggest hits in Hollywood history, such as National Lampoon's Animal House, Ghostbusters, and Beverly Hills Cop. Jim Whalley also considers how SNL has adapted to meet the needs of subsequent generations, launching the film careers of Mike Myers, Adam Sandler, Will Ferrell and others in the process. Supported by extensive archival research,

some of Hollywood's most popular comedians are placed into the contexts of film and television comic traditions and social and cultural trends in American life.

Noise/music Paul Hegarty "Noise/Music" looks at the phenomenon of noise in music, from experimental music at the early 20th century to the Japanese noise, music and glitch electronica of today. ... While it provides an excellent historical overview, the book's main concern is in the noise/music that has emerged since the mid 1970s, whether through industrial music, punk, free jazz or the purer noise of Merzbow. The book progresses seamlessly from discussions of John Cage, Erik Satie and Pauline Oliveros through to bands like Trobbing Gristle and the Boredoms. Modern Music and After

Paul Griffiths 2011-02-16

Over three decades, Paul Griffiths's survey has remained the definitive study of music since the Second World War; this fully revised and updated edition re-establishes *Modern Music and After* as the preeminent introduction to the music of our time. The disruptions of the war, and the struggles of the ensuing peace, were reflected in the music of the time: in Pierre Boulez's radical reformation of compositional technique and in John Cage's development of zen music; in Milton Babbitt's settling of the serial system and in Dmitry Shostakovich's unsettling symphonies; in Karlheinz Stockhausen's development of electronic music and in Luigi Nono's pursuit of the universally human, in Iannis Xenakis's view of music as sounding mathematics and

in Luciano Berio's consideration of it as language. The initiatives of these composers and their contemporaries opened prospects that haven't yet stopped unfolding. This constant expansion of musical thinking since 1945 has left us with no singular history of music; Griffiths's study accordingly follows several different paths, showing how and why they converge and diverge. This new edition of *Modern Music and After* discusses not only the music of the fifteen years that have passed since the previous edition, but also the recent explosion of scholarly interest in the latter half of the twentieth century. In particular, the book has been expanded to incorporate the variety of responses to the modernist impasse experienced by composers of the 1980s and 1990s. Griffiths then moves the book into the twenty-first century as he examines such highly influential
